Foreword

The Summary Statistics report describes police services and crime trends in British Columbia. It is published every year by the Ministry of Public Safety and Solicitor General. This edition covers the ten-year period from 1992 to 2001, with emphasis on 2001.

The report summarizes the structure of policing, the type and incidence of criminal activity, the number and distribution of police personnel throughout the province, and the cost of police services. The appendices contain detailed data for individual policing jurisdictions, as well as for the province.

There may be some variance in the data and statistics in this edition of the Summary Statistics report in comparison to previous editions. Where this occurs, the latest edition will reflect the most current data. In addition, all numbers quoted in Chapters 1 to 6 have been rounded off and therefore may vary from the data contained in Appendices A to D. In cases where a disparity exists, the data contained in Appendices A to D is considered the most accurate.

Policing and Crime Data Collection in British Columbia

Overview of the Structure of Policing in British Columbia 13

British Columbia Policing Jurisdictions 17

Overview of Crime Data Collection Procedures in British Columbia 23

INTRODUCTION

Overview of the Structure of Policing in British Columbia

Residents of British Columbia receive police services from an RCMP provincial force, 59 RCMP municipal forces, 12 independent municipal forces, and three First Nations forces (FNAPS). In addition, the RCMP federal force, the Organized Crime Agency of British Columbia (OCABC), and the Canadian National and Canadian Pacific railway police forces also provide law enforcement within the province.

Municipalities with a population exceeding 5,000 persons are responsible for providing police services within their boundaries. These municipalities may contract with the RCMP to provide municipal policing or they may form an independent (non-RCMP) municipal force. The RCMP provincial force polices municipalities with a population below 5,000 persons, as well as unincorporated (usually rural) areas.

Provincial and municipal RCMP detachments provide police services to specific geographic locations within the province as do the independent municipal forces and the First Nations forces. Either a municipal, provincial or FNAPS force polices each area in the province. A complete list of municipal, provincial and First Nations policing jurisdictions is provided at the end of this section.

RCMP Provincial Force

The RCMP provincial force serves unincorporated areas as well as 83 municipalities with populations below 5,000 persons. In 2001, the provincial force had an authorized strength of 1,694 officers. The provincial force consists of 121 provincial force units or detachments and is responsible for providing police services to a population of 731,933 persons.

The cost of the provincial force is shared between the federal and provincial governments under the terms of the Provincial Police Services Agreement. The province pays 70% of the contract costs while the federal government pays the remaining 30%. Municipalities with a population of less than 5,000 do not make a direct contribution toward the provincial police services they receive. However, the rural property tax collected by the province from residents in the unincorporated areas serves to offset, to some degree, the cost of policing rural areas.

The RCMP provincial force detachments are usually named after the municipalities in which the detachment offices are located. For example, the Oliver RCMP provincial unit polices not only the Town of Oliver but also the rural areas and other communities contained within the detachment's boundaries.

The RCMP provincial force is also responsible for policing unincorporated areas surrounding municipalities that have populations exceeding 5,000 persons. For example, the Kamloops RCMP provincial unit is only responsible for policing areas outside the municipal boundaries of the City of Kamloops since the City is served by a municipal RCMP force.

Where both municipal and provincial units are located in the same detachment, the RCMP members from each unit report to one commanding officer and provide police services to the combined provincial and municipal policing areas.

Municipal Police Forces

Under the Police Act and the Local Government Act a municipality must assume responsibility for its police services when, as a result of a Canada Census, its population reaches 5,000 persons. In 1996, there were 67 municipalities with populations exceeding 5,000 persons. This number increased to 71 in 1997 following the release of the 1996 Canada Census results.

As previously mentioned, these municipalities may form their own independent police forces or contract with the RCMP for municipal policing services. As discussed below, 12 municipalities have their own police departments, while 59 contract with the RCMP for municipal police services.

Independent Municipal Forces

Currently, 12 municipalities in British Columbia have formed their own police departments. These 12 police departments are referred to as independent municipal police forces, since each of the municipalities is responsible for its policing costs.

The 12 independent municipal forces include Vancouver, Victoria, Saanich, Central Saanich, Esquimalt, Oak Bay, Delta, Abbotsford, New Westminster, West Vancouver, Nelson and Port Moody.

In 1995, the municipalities of Matsqui and Abbotsford amalgamated into one municipality. Prior to 1995, the RCMP policed Abbotsford and an independent police department policed Matsqui. The new municipality adopted the name of Abbotsford and is policed by the independent Abbotsford Police Department (formerly known as the Matsqui Police Department).

RCMP Municipal Forces

In 2001, there were 59 municipalities with RCMP municipal police services. Each of these municipalities has signed a Municipal Police Unit Agreement with the federal and provincial governments for the provision of RCMP police services to the area within their municipal boundaries. Under this agreement (contract), the cost of policing these municipalities is shared between the municipality and the federal government.

There are two different cost-sharing formulas. Municipalities with populations exceeding 15,000 persons are responsible for 90% of the cost of their RCMP police services. Municipalities with populations between 5,000 and 15,000 persons are responsible for 70% of the cost of their RCMP police services. The federal government pays the remaining 10% and 30% respectively. However, municipalities with RCMP agreements pay 100% of their accommodation and support staff.

Chronology of New RCMP Municipal Forces (1986–2001)

During the 1980s, eight B.C. municipalities exceeded 5,000 population and became responsible for their police services. Rather than establish their own police departments, or contract for municipal police services, it was

agreed that the province, through the RCMP provincial force, would extend police services to these municipalities on a fee-for-service basis. In 1992, seven of these "extended" municipalities — Revelstoke, Coldstream, Pitt Meadows, Colwood, North Saanich, Parksville (Oceanside) and Port Hardy — converted to RCMP municipal contracts. The eighth municipality, Fernie, converted in 1994.

The results of the 1991 Canada Census revealed that the population of three municipalities — Sechelt, View Royal and Smithers — had exceeded 5,000 persons. Consequently, these municipalities became responsible for their police services in 1992. Two of the municipalities signed RCMP municipal contracts in 1992 and the third, Smithers, signed a municipal contract in 1994.

In 1993, Qualicum Beach expanded its municipal boundaries and its subsequent population exceeded 5,000 persons. Qualicum Beach entered into a contract for RCMP municipal police services during that year.

In 1994, Langford became incorporated as a municipality with a population exceeding 5,000 and signed a RCMP municipal police services contract.

Overall, between 1992 (when seven of eight extended contracts were converted to municipal contracts) and 1994 (when an eighth extended contract was converted and Langford was incorporated as a municipality) the number of RCMP municipal police contracts rose from 43 to 56.

Between 1995 and 1997, the number of RCMP municipal contracts decreased by two contracts to 54. In 1995, Abbotsford (RCMP municipal force) and Matsqui municipalities amalgamated forming the Municipality of Abbotsford with an independent municipal force. In 1997, Fernie, as a result of the 1996 Canada Census, reverted from an RCMP municipal force to a provincial force jurisdiction.

The results of the 1996 Canada Census resulted in five municipalities — Hope, Ladysmith, Lake Country, Spallumcheen and Whistler — becoming responsible for providing municipal police services. Consequently, the number of RCMP municipal contracts increased to 59.

As a result of the 2001 Canada Census, there will be changes in the number of municipalities responsible for policing costs in 2002.

First Nations Policing

The First Nations Policing Policy, announced in June of 1991 by the federal government, gives First Nations communities the opportunity to participate with provincial and federal governments in the development of dedicated policing services within their communities. First Nations communities may choose to develop and administer their own policing service, or they may choose a police service delivered by First Nations RCMP officers working within the RCMP provincial force. The First Nations Policing Policy is designed to give First Nations communities greater control over the delivery and management of policing services within their communities.

First Nations Community Policing Services (FNCPS)

There are 38 RCMP officers working out of 22 RCMP detachments who are part of the First Nations Community Policing Services (FNCPS) and three RCMP officers are employed as Program Coordinators/Policy Analysts in Aboriginal Policing Services at Vancouver, Kamloops and Prince George (North District) Headquarters. These officers serve many aboriginal communities. Each FNCPS unit is established under a tripartite agreement between the province, the federal government and the participating Band. The provincial share of funding the FNCPS is 48% while the federal share is 52%. The program represents an enhancement of the RCMP provincial police service.

Community Constable Program (ACCP)

In those communities where a tripartite agreement has not yet been signed, the RCMP continues to operate its Aboriginal Community Constable Program (ACCP). Under the ACCP, there are 32 First Nations officers who work out of 25 RCMP detachments and serve a number of aboriginal communities. The province pays 54% and the federal government pays 46% of this cost-shared program.

First Nations Administered Police Services (FNAPS)

There are three First Nations Administered Policing Services (FNAPS) in British Columbia. These include Stl'atl'imx Tribal Police, Kitasoo-Xaixais Public Safety Department and Ditidaht First Nation Public Safety and Policing Service. Each of these police services are modelled on the structure of an independent municipal police department, with governance provided by a police board whose members are selected from the communities served. Police officers recruited by the police boards are either experienced officers or graduates from the Police Academy of the Justice Institute of B.C. All officers are appointed under the Police Act.

Overview of Crime Data Collection Procedures in British Columbia

Every police department within British Columbia participates in the Uniform Crime Reporting (UCR) Survey. Managed nationally by the Canadian Centre for Justice Statistics (CCJS), the UCR Survey forms the basis of crime data collection within the province and across the country. The UCR Survey is designed to collect aggregate data on the incidence of crime. It records three major components for each criminal incident: the most serious offence (MSO) within the incident (by type and volume); clearance (by charge or by other means); and persons charged in connection with the offence (by gender and adult/youth).

Statistics Canada, in co-operation with the Canadian Association of Chiefs of Police, developed the UCR data collection system. Although some details of the UCR Survey have been modified since its implementation in 1962, the fundamental aspects of the UCR Survey have remained fairly constant since that time. This publication contains UCR data for the last ten years, 1992 to 2001.

In addition to the UCR Survey, the Ministry of Public Safety and Solicitor General receives more detailed data on specific crime categories such as homicide, sexual assault and spousal assault. These data are collected from three separate, but related, databases including the Operational Statistics Reporting (OSR) System, the UCRII database and the Homicide database.

The Uniform Crime Reporting (UCR) Survey

Provincially, UCR aggregate data are stored in the Police Management Information System (PMIS) maintained by Police Services Division (PSD). The PMIS contains data from 1977 onward. The data are updated monthly and quarterly.

Policing jurisdictions in B.C. perform periodic reviews or audits to ensure their crime data are recorded accurately. PSD also monitors this data to identify any discrepancies. As a result, the UCR data contained in this report are considered to accurately represent B.C.'s crime trends.

The collection, analysis and explanation of crime data can be complex due to the diverse ways in which the data can be examined. Different data collection systems produce different findings of the same series of events because the data reflect the definitions that are used and the manner in which information is gathered.

The UCR Survey records police-reported crime data. As such, UCR data contains only information on those crimes that come to the attention of the police and are reported by the police. UCR crime data does not contain a count of all crimes in B.C.; some crimes are never detected, and some that are detected are never brought to the attention of the police.

Victimization surveys provide data that are complementary to UCR data. These surveys are generally conducted by telephone and involve questions concerning the victimization of respondents. Victimization surveys contain information on a greater number of criminal incidents than the UCR data because victims are asked to describe both incidents they reported to the police and incidents they did not report. Victimization surveys contain methodological features that preclude information on such crimes as homicide and kidnapping, as well as "victimless crimes" (i.e., prostitution and drug offences), crimes committed against commercial or public property, and crimes committed against persons under sixteen years of age.

UCR Survey Rules

The police occurrence report forms the basis of data collection for the UCR Survey. There are standard rules for counting incidents, persons charged and clearance data under the UCR Survey. A review of the most basic UCR Survey rules, and the ramifications of each, are discussed below.

Unfounded Incidents

Reported offences (crimes reported by citizens to the police or crimes otherwise detected by police) are subject to a preliminary investigation by the police to determine the validity of the report. On occasion, a reported offence may not have actually occurred. For example, a vehicle that is reported stolen may turn out to have been borrowed by a family member. These incidents are considered "unfounded" and are subtracted from the number of reported offences to produce the number of actual offences.

In this publication, the number of offences always refers to actual rather than reported offences.

Number of Offences

The total number of UCR offences is not a census of all crimes that are reported by the police. This occurs for two reasons. First, under the UCR Survey, most violent crimes (i.e., attempted murder and homicide, sexual offences, non-sexual assault, abduction) are scored differently from property and "other" crimes (i.e., prostitution, arson, and vandalism, among others). The number of violent offences recorded is equal to the number of victims involved in an incident of violent crime. For example, when one person murders three people, three offences are recorded, whereas when three people murder one person, only one offence is recorded. For all property crimes, other crimes, and the violent crime of robbery, the total number of offences recorded is equal to the number of distinct or separate incidents. For example, in an incident where several vehicles parked in one block are spray-painted with paint from the same spray can, only one incident of vandalism is reported.

The second reason that the total number of UCR offences does not represent the total of all crime reported by the police occurs as a result of the "most serious offence" (MSO) rule. The MSO rule stipulates that where a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. There are standard rules for determining the most serious offence where crimes in the same incident are of a similar severity. The application of the MSO rule tends to underestimate the true incidence of relatively less serious crimes that come to the attention of the police because these crimes are counted only when they do not occur in conjunction with a more serious crime in the same incident.

In short, the total number of UCR offences represents the number of victims of violent crimes plus the number of separate incidents of property and other crimes.

Clearance

When the police have identified at least one offender in relation to an offence and have sufficient evidence to solve the offence, a Report to Crown Counsel (RCC) recommending charges is completed and forwarded to the local Crown counsel office. Once an RCC is forwarded, the police consider the incident to be cleared by charge and this status is reported in the UCR Survey. This occurs even if the police have not yet apprehended the accused.

In some instances, the police identify an offender and have enough evidence to support a charge but do not recommend charges. Such offences are reported in the UCR Survey as "cleared otherwise"—that is, cleared other than by recommending charges to Crown. Offences are cleared otherwise in specific situations such as the offender is under the age of 12, the victim is uncooperative, the offender has diplomatic immunity, or the offender has been sentenced for other crimes.

Persons Charged

When an offence is cleared by charge, the number of persons recommended for charge by the police is recorded in the UCR Survey. These persons are categorized according to gender and age (adult vs. youth).

The UCR Survey reporting rules dictate that offenders who are simultaneously recommended for charge on more than one offence are counted only once against the most serious offence. In addition, offenders are counted each time the police recommend charges against them (for separate incidents). Consequently, the persons charged data represents a count of the number of persons for whom charges were recommended, rather than a count of the number of separate individuals recommended for charge. As a result, the correlation of persons-charged data with court data is difficult because the UCR Survey does not contain information regarding the total number of recommended charges.

Time Lapse

UCR data are reported monthly by each of the reporting police departments and are available on this basis to interested users. Incidents are recorded in the UCR Survey against the months in which they came to the attention of police, regardless of when the incidents actually occurred. A criminal incident may be solved weeks or months after the incident is recorded in the UCR Survey. Consequently, a one-to-one relationship does not exist between the number of actual offences and the number of cleared offences in any given time frame.

Other Crime Databases

Operational Statistics Reporting (OSR) System

The Operational Statistics Reporting (OSR) System operates within the Police Information Retrieval System (PIRS) and is primarily utilized by the RCMP. The OSR is an incident-based database that stores more detailed information concerning criminal events including characteristics of the accused, victim and offence. In addition, the OSR permits the collection of special survey statistics within the province. For example, these special survey codes are used to identify cases involving spousal assault or child abuse.

Because the OSR contains three of the basic elements of the UCR Survey (i.e., MSO, clearance and persons charged), UCR aggregate data can be extracted from the OSR.

Uniform Crime Reporting II (UCRII) Survey

The UCRII Survey represents an expansion of the UCR Survey. It captures data at the incident level (similar to the OSR) as well as at the accused and victim levels. Examples of the data captured in the UCRII include detailed crime information (i.e., modus operandi, value of property lost), detailed accused information (i.e., date of birth, charges) and detailed victim information (i.e., date of birth, degree of injury and relationship between the victim and the accused).

Over 166 jurisdictions in Canada participate in the UCRII Survey. Prior to 2001, the Vancouver Police Department was the only police force in B.C. which contributed to the UCRII Survey. In 2001, however, a new integrated records management system suitable for use by all police agencies in the province was implemented in three municipalities. This new system called PRIME (Police Information Management Environment) is designed to capture all the data elements of the UCRII Survey. PRIME has now been implemented in Vancouver, Port Moody and Richmond, and will be rolled out to the rest of the province over the next few years .

Because the UCRII contains three of the basic elements of the UCR Survey (i.e., MSO, clearance and persons charged), UCR aggregate data can be extracted from specific UCRII fields at the incident and accused levels.

The Homicide Survey

All jurisdictions in Canada participate in the national Homicide Survey. Police agencies are required to complete a detailed survey questionnaire for each homicide they report. Aspects of the incident, including characteristics of the victim and accused, are recorded. The Homicide Survey database is administered and updated by the CCJS, and provided to PSD on an annual basis. Once the Homicide Survey data becomes available, it updates and replaces the UCR Survey homicide data.

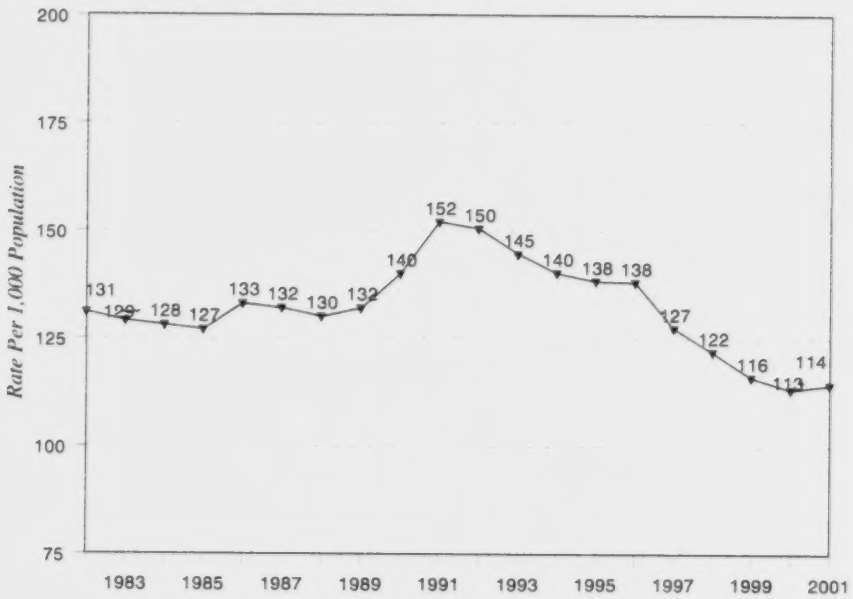
CHAPTER 1

SUMMARY

Summary of Crime in British Columbia

In 2001, there were 468,080 (non-traffic) crimes reported in British Columbia. This is 8,480 or 2% more than the number of crimes reported in 2000. The 2001 crime rate was 114 crimes per 1,000 population, an increase of 1% from the 2000 crime rate of 113 crimes per 1,000 population.

Figure 1: British Columbia Crime Rate, 1982 to 2001.



Until 2001, British Columbia's crime rate had been on a downward trend during the previous 10 years. Several theories have been proposed for the decrease, however, fluctuations in the incidence of criminal activity are not easily explained or understood.

Many factors influence the reporting of crimes to the police. For instance, policy decisions or legislative changes that affect police enforcement practices may impact the reporting of some types of crimes. Factors such as age, gender, level of income and education of either the victim or offender may also affect reporting. In addition, it has been suggested that population density and changes in public attitude may contribute to fluctuations in the reporting of certain types of crime.

Overall decreases in the crime rate have been reported around the world in recent years. Many theories have been put forth to explain these declines. The most popular theory is based on demographics (i.e., a drop in the proportion of young males aged 15 to 24 in the population has resulted in a corresponding decline in the crime rates). Other explanations include the move toward community-based policing (i.e., informal methods of resolving conflict lead to fewer crimes being reported), declining police budgets, and aggressive law enforcement practices.

It is unlikely that a single factor or theory accounts for recent declines in the crime rate. More likely, a combination of factors accounts for this downward trend.

This chapter provides a brief description of the number and types of Criminal Code offences, municipal and provincial crime rates, the number of crimes solved, and the number of persons charged in British Columbia. At the end of the chapter there is a discussion of youth crime.

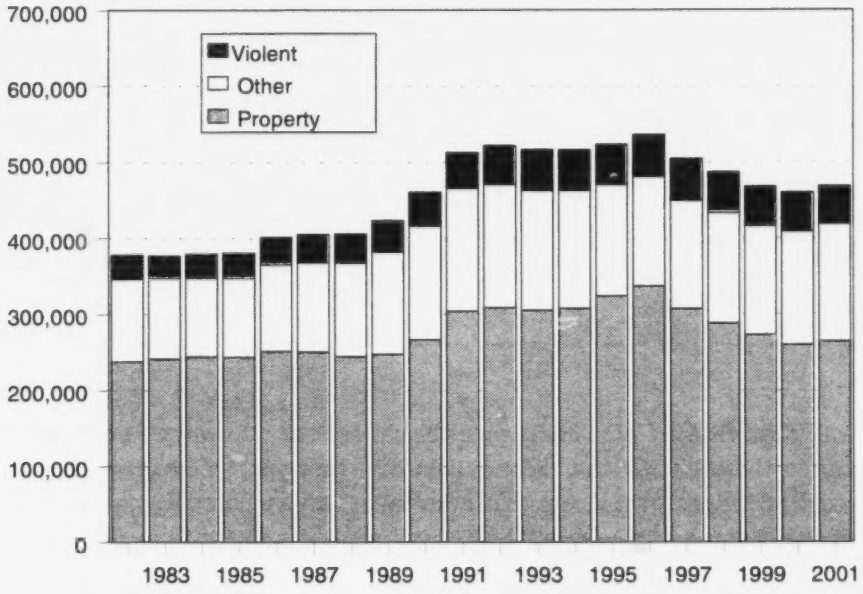
In Chapters 2, 3 and 4, the characteristics and trends of various Criminal Code offences are discussed in more detail. In Chapters 5 and 6, those offences arising from federal drug statutes, and Criminal Code and provincial traffic statutes are discussed.

In 2001 there were 468,080 reported Criminal Code offences, 8,480 more than reported in 2000.

Criminal Code Offences

Criminal Code offences are divided into three major categories: crimes against persons (or violent crimes), crimes against property and other crimes.

Figure 2: Number of Crimes by Category, 1982 to 2001.



These Criminal Code categories do not include drug offences or offences under other federal statutes such as the Customs Act or the Canada Shipping Act. They also do not include offences under provincial statutes such as the Liquor Control

and Licensing Act or the Securities Act, nor do they include Criminal Code traffic offences, provincial and municipal traffic offences, or other municipal by-law infractions.

In 2001, there were 468,080 Criminal Code offences reported, 8,480 or 2% more than in 2000. During the past decade, however, the number of Criminal Code offences reported has decreased. From 1992 to 1996, there was a decrease of 3% and from 1997 to 2000 a further decrease of 7% was reported. The increase in 2001 is the first increase reported in five years.

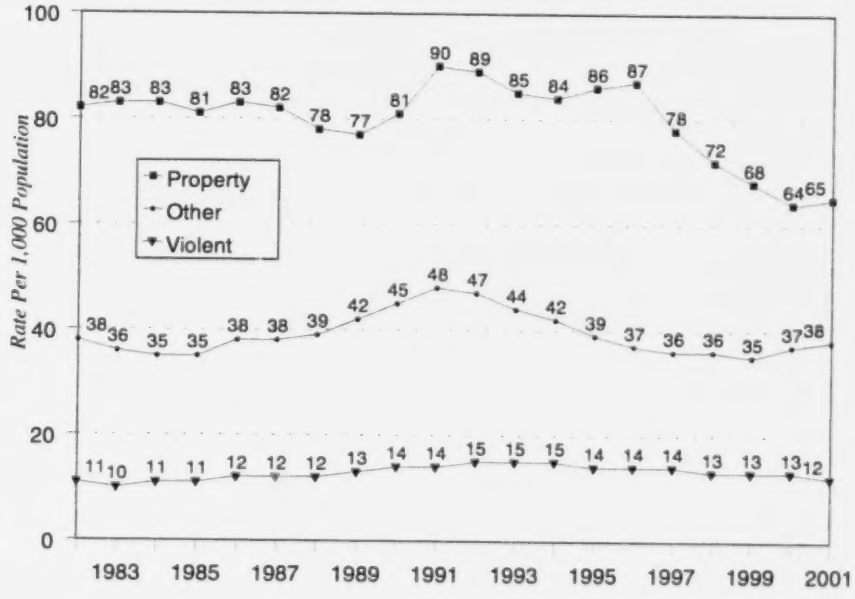
In 2001, crimes against persons (violent offences) represented 11% of all Criminal Code offences; crimes against property accounted for 56%; while the remaining 33% were other crimes. These proportions have remained about the same over the last decade.

Crime Rate

The crime rate is the number of Criminal Code offences reported for every 1,000 people. It is often a better measure of trends in crime than the actual number of offences because it allows for population growth. B.C.'s crime rate in 2001 is 114 reported Criminal Code offences per 1,000 people, 1% more than in 2000.

The B.C. crime rate rose by 1% in 2001. Despite this small increase, B.C.'s crime rate has declined 24% since 1992.

Figure 3: British Columbia Crime Rate by Category, 1982 to 2001.



After peaking at a high of 152 Criminal Code offences per 1,000 persons in 1991, B.C.'s crime rate decreased steadily over the last decade (see Figure 1). From 1992 to 2000, B.C.'s crime rate decreased by 24%. The 2001 crime rate, although a 1% increase over the 2000 rate, is still one of the lowest reported in over 20 years.

Fluctuations in the crime rate are quite often the result of changes in the number of property crimes. As shown in Figures 2 and 3, property offences have a major

impact on the crime rate as they account for approximately 60% of total reported crime. The property crime rate rose 1% between 2000 and 2001, after declining by 25% between 1996 and 2000.

British Columbia's crime rate is traditionally higher than the national average. In 2001, with the exception of Saskatchewan, B.C.'s crime rate was higher than any other province. Crime rates tend to increase from east to west; crime rates in the Atlantic provinces are generally lower than in Quebec and Ontario, which in turn are lower than rates in the Western provinces. There is no satisfactory explanation for this phenomenon.

Although B.C.'s crime rate is historically higher than the rest of the country, trends detected in the national crime rate data are frequently parallelled in B.C. (Please note this report does not include comparisons with other provinces. National data are available from the Canadian Centre for Justice Statistics, Statistics Canada.)

More often than not, a high crime rate indicates that a municipality is a core city or tourist destination.

It is important to keep in mind that the crime data included in this publication are limited to those crimes reported to or by the police. Victimization surveys indicate that a substantial number of crimes are never reported to the police.

Municipal Crime Rates

In 2001, municipal crime rates (the number of crimes per 1,000 resident population in a particular municipality) ranged from a low of 34 to a high of 253 Criminal Code offences per 1,000 population. The average crime rate for municipalities in British Columbia in 2001 was 121 crimes per 1,000 population.

Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Unincorporated areas or other municipalities that have significant residential populations usually surround core cities. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owners, students or seasonal staff.

The municipal crime rate is based on the resident population of a municipality that excludes commuters, students, tourists and other part-time residents. If a person from outside a municipal boundary enters and commits a crime or becomes a victim of crime, that crime is attributed to the municipality. Since the person does not reside within the municipality, he or she is not included in the municipal resident population. Consequently, core cities and tourist destinations often have higher than average crime rates. Examples of core cities include Vancouver, Victoria, Williams Lake, Courtenay and Whistler.

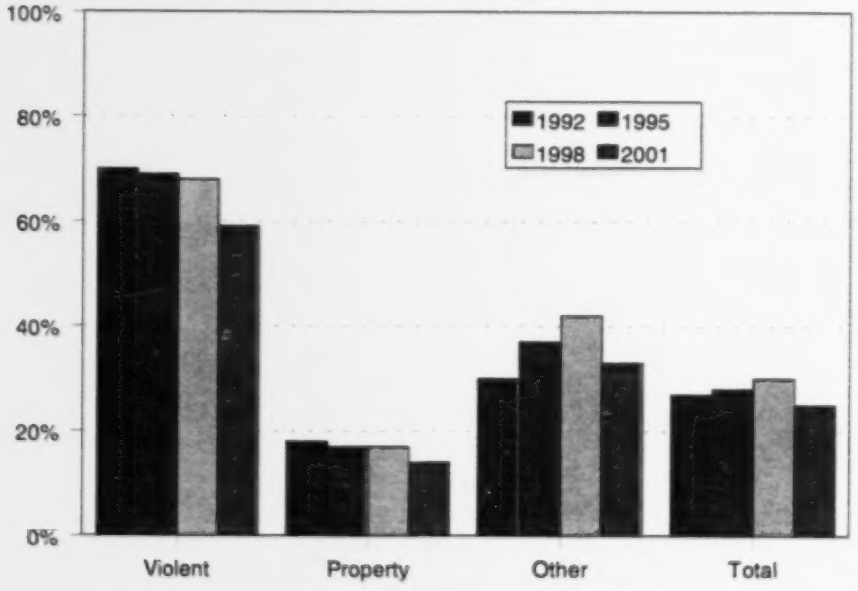
If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

Although municipal crime rates cannot be used to measure the relative safety of one location over another, they can be used as an indication of the trend in crime in each municipality. If two municipalities share similar characteristics, comparing their actual crime rates may be valid. However, these comparisons should be made with a great deal of caution.

Crimes Cleared (Solved)

When police solve an offence, they record that it has been cleared by charge or cleared by other means. An offence is cleared by charge when the police file a Report to Crown counsel (RCC) recommending charges. An offence is cleared by other means when the police have identified an offender and have enough evidence to support a charge, but for a variety of reasons do not recommend a charge. Offences are cleared otherwise in specific situations such as the offender was under 12 years of age, the victim was uncooperative, in a case of diplomatic immunity, or the offender was previously sentenced.

Figure 4: Percentage of Crimes Cleared 1992, 1995, 1998 and 2001.



In 2001, police solved (cleared) 25% of all reported Criminal Code offences.

In 2001, 25% of all reported Criminal Code offences were cleared (solved). Approximately 14% were cleared by charge, and 11% were cleared by other means. The remaining 75% of offences remain unsolved.

The clearance rate is the number of crimes solved by police as a percentage of the number of crimes reported to police. There is a considerable difference in the clearance rates for violent crimes compared with property and other crimes. In 2001, 59% of violent crimes were cleared as opposed to only 14% of property crimes and 33% of other crimes.

Between 1992 and 1999, the percentage of violent crimes cleared remained relatively stable, ranging from 68% and 71%. During 2000 and 2001, the violent crime clearance rate dropped to 64% and 59% respectively.

The clearance rate for property crimes remained stable at 17% between 1993 and 1999. In 2000 and 2001, the property crime clearance rate dropped to 15% and 14% respectively.

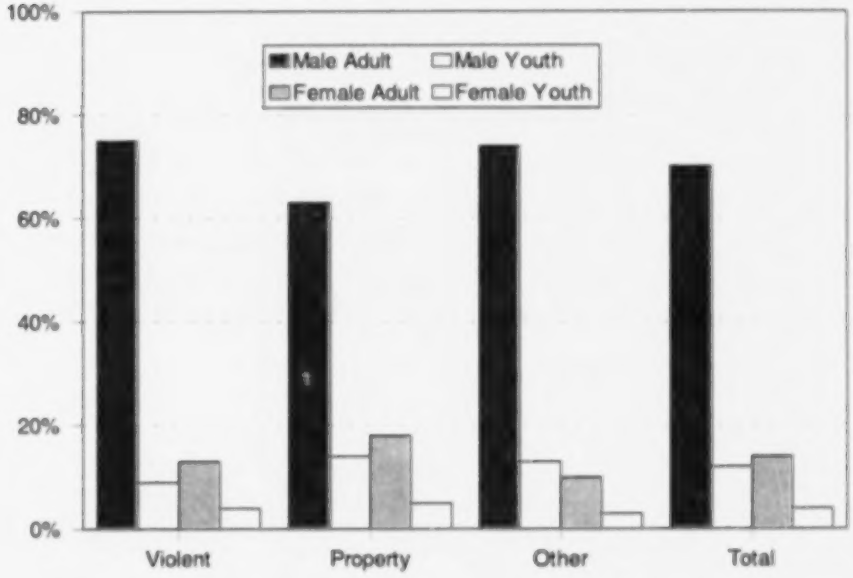
Clearance rates for other crimes have steadily increased from a low of 30% in 1992 to a high of 44% in 1999. In 2000, the other crime clearance rate dropped to 36%, and was reduced further by a decrease to 33% in 2001.

Persons Charged

In 2001, the police reported that 64,960 persons were charged with Criminal Code offences in British Columbia. Since Crown counsel determines whether a charge will be laid, this figure actually represents the number of persons recommended for charge by the police.

In 2001, of the 64,960 persons recommended for charge, 84% were adults and 16% were young offenders.

Figure 5: Persons Charged in B.C. by Gender and Type of Offence, 2001.



Of the 64,960 persons charged, 20,510 (32%) were charged with crimes of violence, 27,020 (41%) with property crimes, and 17,430 (27%) with other crimes. By comparison, violent crimes represent only 11% of reported crime, property crimes represent 56% of reported crime, and other crimes represent 33% of reported crime.

Persons charged data are divided into four categories: adults, male and female; and youths, male and female. In Canada, a young offender (youth) is between 12 and 17 years of age and an adult offender is 18 years and older. In 2001, of the 64,960 persons recommended for charge, 10,380 (16%) were young offenders and 54,580 (84%) were adults.

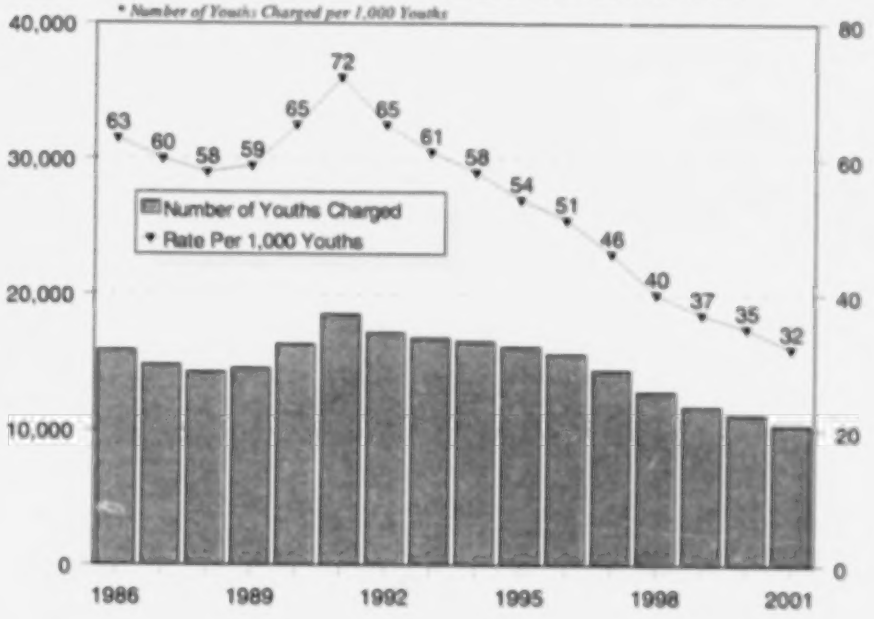
In 2001, approximately 83% of the 54,580 adults charged and 74% of the 10,380 youths charged were male. These proportions have remained constant over the last decade.

In 2001, adults represented 88% of persons charged with violent crimes, 81% of persons charged with property crimes and 84% of persons charged with other Criminal Code offences. Young offenders represented only 12% of persons charged with violent crimes, 19% of persons charged with property crimes and 16% of persons charged with other Criminal Code offences.

Youth Crime

In B.C., as in the rest of Canada, young persons between the ages of 12 and 17 who break the law are subject to the same charges as adults. The difference is that youths are processed under the Young Offenders Act (YOA) which came into effect in 1985.

Figure 6: Youths Charged, Number & Charge Rates, 1986 to 2001.*



There is no offence known as youth crime; rather the determination that an accused person is a young offender is based on the age of the offender at the time the offence was committed. The data discussed below are based on the number of youths charged with criminal offences, i.e., the number of youths for whom the police submitted a report to Crown counsel. Unless the police solve the offence, it is not known whether an adult or youth committed the crime. Therefore, data on youth crime are dependent on the identification of the offender by the police.

Though less than 30% of total reported crimes are solved, it is assumed that youth charged data (the number of Criminal Code charges reported per 1,000 persons between the ages of 12 and 17) provide an indication of trends in youth involvement in crime.

There is a widespread impression across Canada that youth crime – especially violent youth crime – is out of control. This perception is supported by the fact that there was an increase in the number of youth charged from the mid-1980s (after the

There is no offence known as youth crime; rather, the determination that an accused person is a young offender is based on the age of the offender at the time the offence was committed.

introduction of the YOA in 1985) until 1991. The media often focus on high profile incidents of youth violence and cite the increase in the youth violent crime charge rate (until 1994) as evidence of an increase in youth crime. Some observers argue that the rise in youth crime is a consequence of the leniency of the YOA.

In 1991, the youth charge rate peaked (the violent youth charge rate did not peak until 1994). Since that time, B.C. has experienced a downward trend in youth charge rates.

Detecting the real extent of youth involvement in crime is difficult. Fluctuations in trends in crime data can be influenced by a variety of factors including changes in law, changing levels of community tolerance toward specific types of crime, changing social policy, or changes in charging practices.

In 2001, 76% of the criminal offences for which young people were charged were non-violent crimes.

Legislative Changes Dealing With Young Offenders

In 1999, the federal Minister of Justice introduced the Youth Criminal Justice Act (YCJA) in the House of Commons. The Act received Royal Assent in 2002 and is expected to replace the current Young Offenders Act in 2003.

The new legislation is primarily aimed at differentiating between violent or repeat offenders, and first-time offenders who commit non-violent or less serious crimes.

The Act provides not only for sentencing based on the seriousness of the crime but also encourages sentencing which is community based (i.e., victim compensation, community service and supervision).

In addition, the YCJA provides for the imposition of adult sentences as well as rehabilitative custody and supervision sentences in the case of violent and high-risk offenders.

Youth Crime in 2001

In B.C., there were 10,380 young offenders charged with Criminal Code offences in 2001, 720 or 6% less than in 2000. This represents a youth charge rate of 32 charges per 1,000 youths, an overall decrease of 9% from B.C.'s youth charge rate in 2000.

Approximately 76% of the criminal offences for which young people were charged were non-violent crimes (i.e., crimes against property or other Criminal Code offences). The remaining 24% of charges against youth were for violent crimes.

Youths represented 16% of total persons charged in 2001. Youths represented 12% (2,540 of 20,510) of those charged with violent offences; 19% (5,120 of 27,020) of those charged with property offences; and 16% (2,720 of 17,430) of those charged with other Criminal Code offences.

Substantially more male youths are charged with Criminal Code offences than female youths. In 2001, about three-quarters of the youths charged with Criminal Code offences were male. Approximately 83% of adults charged within the same crime categories were male.

Youth Crime Trends

During the last ten years, the total population of B.C. youths has increased by 21% from 265,580 in 1992 to 320,060 in 2001 During the same time period, the total population of B.C has increased by 18%. Despite an increase in the total number of young people aged 12 through 17 years, the proportion of youths in the province has remained stable at approximately 8% of the total population.

In 2001, youths represented 12% of persons charged with violent crimes.

There were 17,150 charges against youths in 1992 compared with 10,380 charges in 2001. In 2001, the overall youth charge rate for B.C. decreased to 32 charges per 1,000 youths, representing an 9% decrease from 2000 and a 51% decrease from the 1992 youth charged rate of 65.

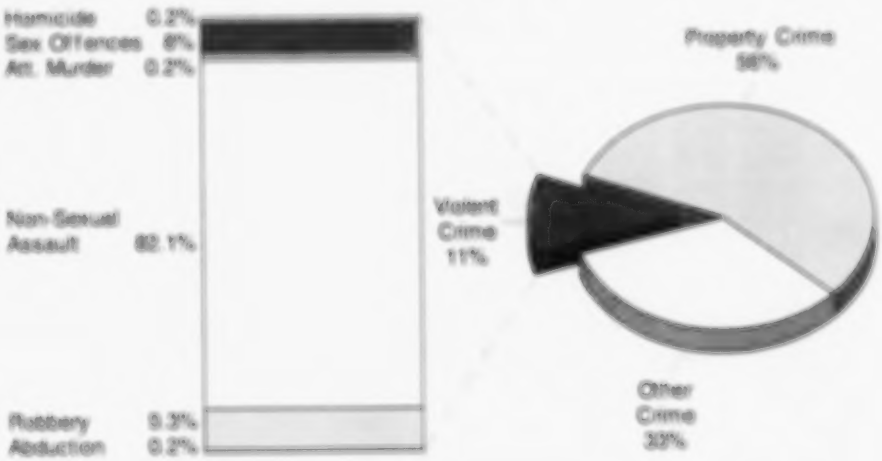
The youth violent-charge rate increased steadily from the implementation of the YOA in 1985 to a peak of 11 charges per 1,000 youths in 1994. From 1995 to 1998, the youth violent-charge rate stabilized at an average of 10 charges per 1,000 youths. From 1999 to 2001, however, it has stabilized at 8 charges per 1,000 youths. B.C. crime data over the past ten years indicate that youths charged with level 1 non-sexual assault (the least serious assault category) represent over 50% of youths charged with violent crimes. It is increases or decreases in this category of crime which largely contribute to fluctuations in the youth violent-charge rate.

CHAPTER 2

VIOLENT CRIME

Violent Crime in British Columbia

Figure 7: Violent Crime by Category, 2001.



Crimes against persons, more commonly called violent crimes, are considered the most serious of the three Criminal Code offence categories. Only 11% of all crime reported during 2001 was categorized as violent. These crimes include homicide, attempted murder, sexual and non-sexual assault, robbery and abduction. Crimes in this category carry the maximum penalty under the law.

Violent Crime in 2001

In 2001, there was a 2% decrease in the number of violent crimes and a corresponding 3% decrease in the violent crime rate (from 12.6 violent crimes per 1,000 population in 2000 to 12.1 violent crimes per 1,000 population in 2001). There were 49,860 violent offences in 2001, 1,140 less than the 51,000 violent offences reported in 2000.

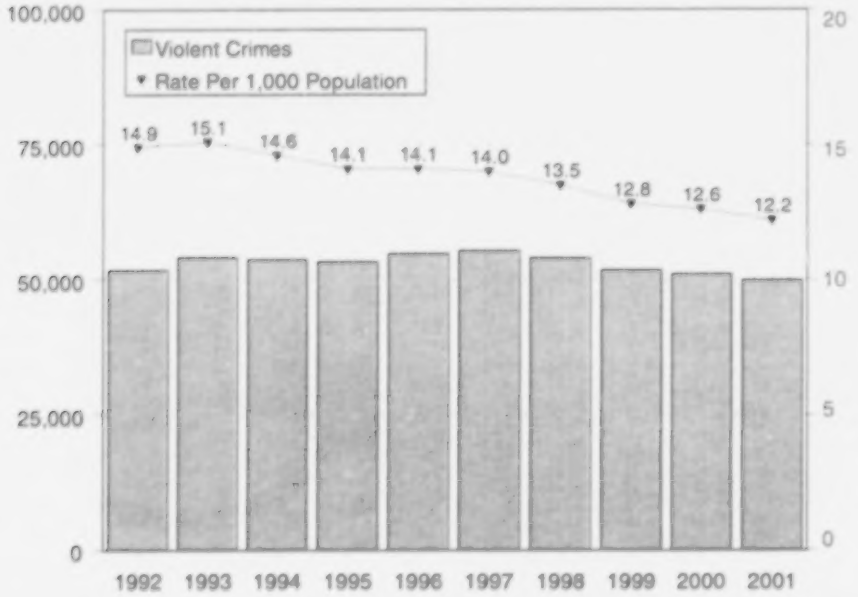
More violent crimes are cleared (solved) than any other type of crime. In 2001, 59% of violent crimes were cleared as opposed to only 14% of property crimes, and 33% of other crimes.

About 88% of those charged were adults (18 years and over) and about 84% of those charged were male.

Violent Crime Trends

In 2001, the number of violent crimes reported decreased for the fourth consecutive year after peaking at a 20-year high in 1997. Prior to 1998, the number of violent crimes rose steadily for 15 years, from 31,790 in 1982 to 55,330 in 1997, a 74% increase.

Figure 8: Number and Rate of Violent Crimes, 1992 to 2001.



While the number of violent crimes has declined over the past decade, the number reported in 2001 is still almost 60% higher than twenty years ago.

When compared with ten years ago, however, the number of violent crimes reported in 2001 is lower than the number reported in 1992. Between 1992 and 2001, the number of violent crimes reported declined 4% from 51,710 in 1992 to 49,860 in 2001. While the number of violent crimes has declined over the past decade, the number reported in 2001 is still almost 60% higher than twenty years ago.

From 1992 to 2001, the violent crime rate also decreased. It fell from 14.9 violent crimes for every 1,000 persons in 1992 to 12.2 in 2001, an overall decrease of 18%. As with the number of violent crimes, the violent crime rate, while decreasing over the past decade, is still 10% higher than 20 years ago.

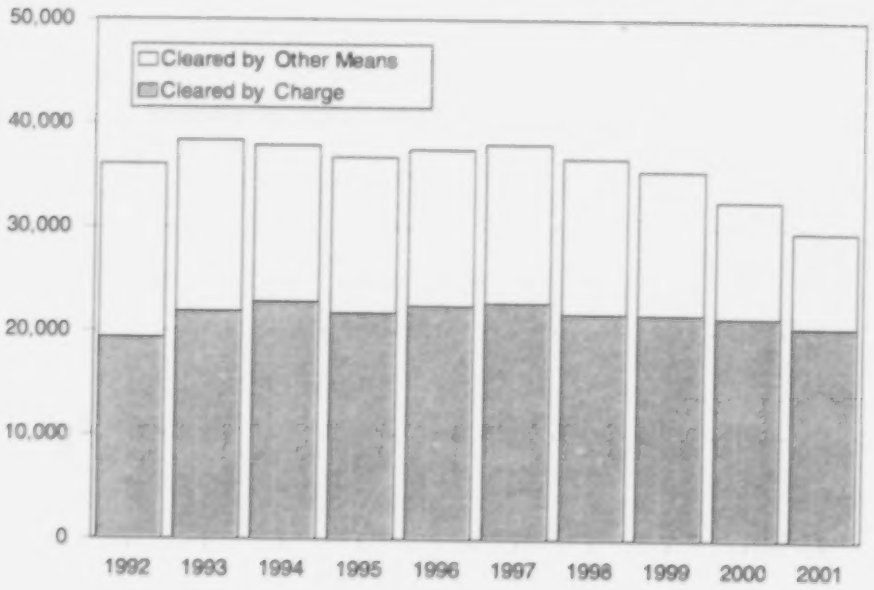
Within the past decade, there have decreases in the categories of homicide, attempted murder, sexual offences, abduction and robbery. In total, the number of offences reported within these categories has declined 23% from 11,640 in 1992 to 8,900 in 2001, a decrease of 2,740 offences. During the same period, however, the remaining violent crime category of non-sexual assaults increased by almost 900 offences or 2%, from 40,070 offences reported in 1992 to 40,950 offences in 2001.

While the decreases in violent crimes such as homicide, attempted murder, robbery and abduction were small during this period, it is the decrease in the number of sexual offences reported which is primarily responsible for the overall decline in the number of violent crimes.

From 1992 to 2001, the number of sexual offences reported has declined 37% from 6,380 in 1992 to 4,010 in 2001, a decrease of 2,370 offences. This includes a 35% decrease in level 1 sexual assaults reported, a 69% decrease in level 2 sexual assaults (those involving a weapon or serious bodily harm), and a 60% decrease in the number of level 3 aggravated sexual assaults.

The overall decline in violent crimes has, to some degree, been offset by the increase in non-sexual assaults, i.e., level 1 assault. This category, which is the least serious category of assaults, represents almost two-thirds of violent crimes reported. From 1992 to 2001, level 1 assaults increased by 5% from 31,950 offences in 1992 to 33,480 offences in 2001.

Figure 9: Number of Violent Crimes Cleared (Solved), 1992 to 2001.



Increases in reported violent offences over the past 20 years may be due to factors other than an increase in the number of these crimes being committed.

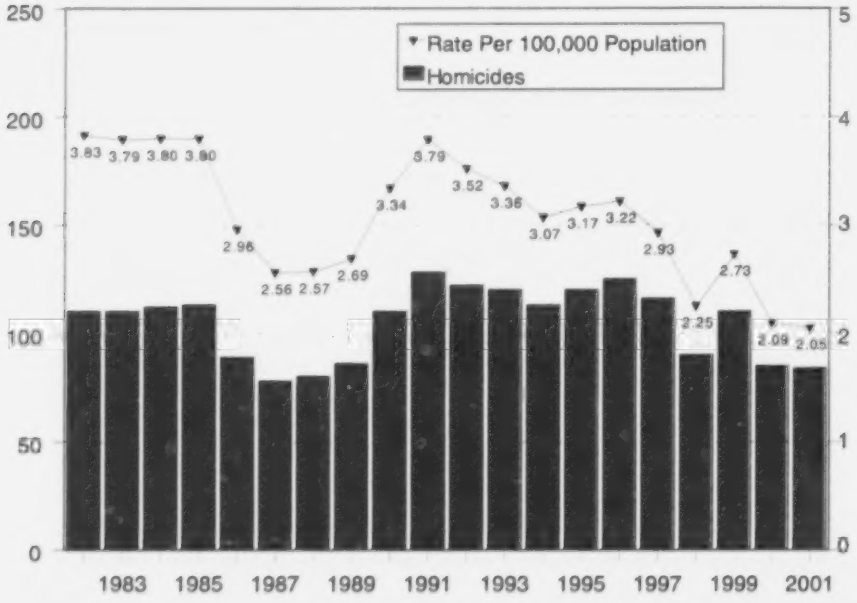
It is important to note that increases in violent offences over the past twenty years might be due to factors other than an increase in the number of these crimes being committed. Changes to federal legislation concerning sexual and non-sexual assault have likely had an impact on the reporting of these offences. Under the revised legislation the previous categories of assault and battery were merged into one offence, and the types of assault were reorganized into a three-tiered system of offences based on the seriousness of harm/violence. Moreover, procedural changes to the legislation enhanced the ability of the police to make arrests and recommend charges. Heightened public awareness and reduced tolerance of violence may also have led to increased reporting of violent crimes. Finally, the stigma of being victimized may be less pronounced today than previously. As a result, crimes of violence that occurred in the past are being reported and recorded in the present.

The number of persons charged with violent crimes has increased by 12% in the last ten years. In 2001, 20,510 persons were charged with violent offences compared with the 18,380 persons charged in 1992.

Homicide

In Canada, homicide offences are classified into four categories as defined by the Criminal Code: first degree murder, second degree murder, manslaughter and infanticide. First degree murder occurs when the death is planned and deliberate, or occurs during the commission of another serious offence or when the victim is a peace officer. Second degree murder is all murder that is not in the first degree. Manslaughter is generally a homicide committed in the heat of passion. Infanticide occurs when a mother causes the death of her newly born child. Deaths caused by criminal negligence, suicide, accidental or justifiable homicide are not included in the criminal homicide classification.

Figure 10: Number and Rate of Homicides, 1982 to 2001.



In 2001 there were 84 homicides in B.C., one less than in 2000.

It should be noted that this publication does not include information from the homicide investigations currently being undertaken by the Missing Women's Task Force. These investigations are ongoing and the incidents have not yet been reported under either the CCJS's UCR or Homicide Surveys.

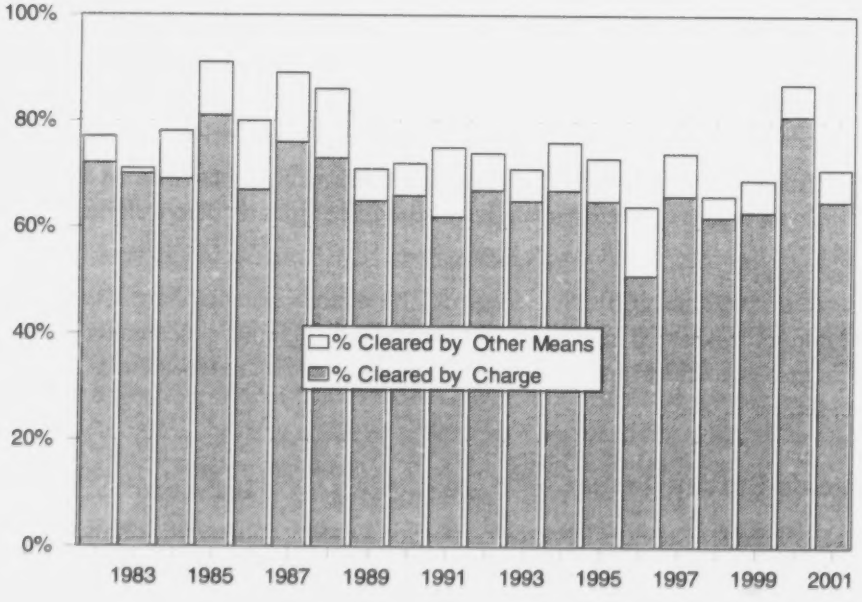
Homicide in 2001

In 2001, there were 84 homicide victims in B.C., one less than the number of homicides reported in 2000. Of these homicides, 36% (30) were first degree, 50% (42) were second degree and 13% (11) were manslaughter and 1% (1) were infanticides. Police cleared 60 homicides and charged 57 persons during 2001.

As in previous years, during 2001 the majority (90%) of persons charged with homicide were male and only 4% of persons charged with homicide were young offenders.

Of the 60 homicides solved in 2001, 88% of victims (53) were killed by someone they knew while 12% (7 victims) were killed by a stranger. When the victim was killed by someone he or she knew, 21% (11 victims) were killed by their spouse or ex-spouse while 23% (12 victims) were killed by a family member other than a spouse or ex-spouse. In addition, 3% (2 victims) were killed by an intimate partner, i.e., boyfriend/girlfriend, while 53% (28 victims) were killed by an acquaintance or friend.

Figure 11: Percentage of Homicides Cleared, 1982 to 2001.



Police cleared 71% of homicides in 2001 and charged 57 persons.

As noted above, in 2001 there were 11 homicides committed by a spouse. Spousal relationships include married (legal and common-law), separated and divorced spouses. In nine of the solved spousal homicides the accused was a legal or common-law husband while in the remaining two incidents, the accused was a legal or common-law wife.

In 2001, 71% (60) of homicide victims were male and 28% (24) were female. Almost 80% (67) of the homicide victims were between the ages of 20 and 50, while 7% (6) of homicide victims were under the age of 19 and 13% (11) were over the age of 50.

Of the total homicide victims in 2001, 33% (28 victims) were stabbed, 29% (24 victims) were killed by shooting, 23% (19 victims) were beaten to death, 12% (10 victims) were strangled or suffocated, and 3% (3 victims) were killed by other means. Approximately three-quarters of shooting victims were killed by handguns, followed by rifles or shotguns (21%) and other firearms (4%).

Homicide Trends

Historically there have been more homicides per capita reported in B.C. than in any other province.

In 2000 and again in 2001, the homicide rate was 2.1 homicides per 100,000 population. (Because the number of homicides per 1,000 persons is small, homicide rates are calculated on a per 100,000 population basis). This rate was the lowest recorded in the past 30 years. During this same period the homicide rate has fluctuated between 2.1 and 4.4 homicides per 100,000 population.

B.C.'s homicide rate in 2001, similar to 2000, was the fourth highest provincial rate in the country. Despite a higher than average homicide rate (the national homicide rate in Canada was 1.8 per 1000 population in 2001), B.C. trends parallel national trends.

Over the last two decades in British Columbia there have been substantially more male victims of homicide, sometimes up to three times as many as female victims.

Between 1992 and 2001, an average of 73% of all homicides were solved.

Between 1992 and 2001, an average of 73% of all homicides were solved. Of the 60 homicides cleared in 2001 (71% clearance rate), 55 were cleared by charge (65% of total homicides) and five were cleared by other means (6% of total homicides).

Homicide Survey Results

In 1999, Police Services Division conducted a survey of homicide offences in British Columbia, the results of which were released in *B.C. Crime Trends Newsletter, Issue #4, (September 2000).* Even though each homicide is a unique criminal event, the results of the survey revealed the following characteristics of homicides in B.C.

A "typical" murder is committed in a single home by a male adult between 18 and 34 years of age. The victim is usually a male between 19 and 34 years of age and the homicide was in all likelihood precipitated by an assault. The accused will be a casual acquaintance of the victim, and the victim will have been either stabbed or shot. The police, in most cases, solve the homicide through the laying of charges.

B.C.'s Unsolved Homicide Unit

In 1996, the provincial government announced the creation of the Unsolved Homicide Unit, an integrated police unit made up of members from the RCMP and the Vancouver Police Department. The purpose of the Unit is to ensure the effective coordination of investigations into unsolved homicides that have occurred over the past 35 years.

Attempted Murder

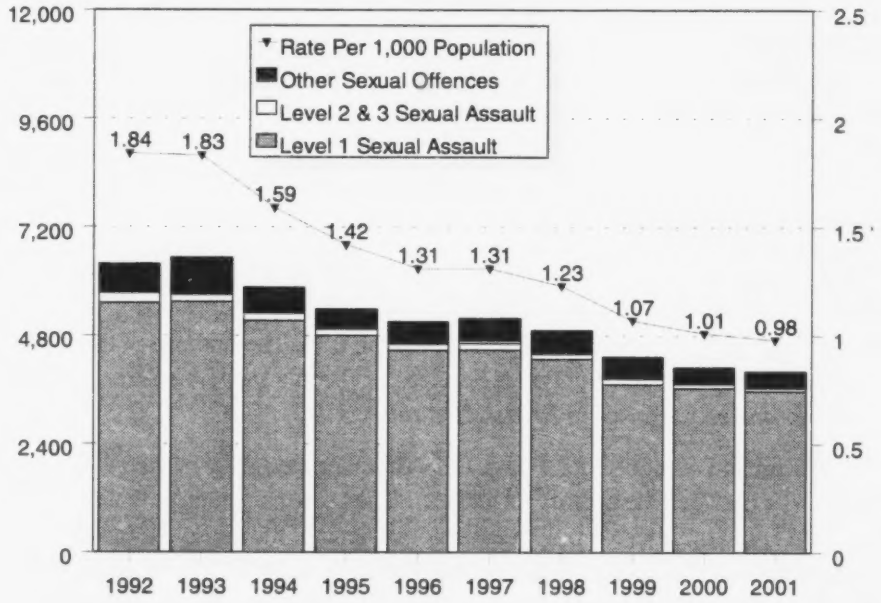
In 2001, there were 94 attempted murder offences in British Columbia. This is a 3% increase from the 91 offences reported in 2000. Between 1992 and 2001 there was an average of 110 attempted homicides per year in B.C. A high of 142 attempted murders was reported in 1992, and a low of 85 attempted murders was reported in 1999.

Sexual Assaults and Other Sexual Offences

Law reforms introduced by the Canadian government in 1983 and 1988 served to change the substantive, procedural and evidentiary aspects of Canada's rape law. Under the revised legislation, the crimes of rape, attempted rape and indecent assault were repealed and replaced with a three-tiered system of sexual assault. In addition, new sexual offences were also introduced specifically to deal with child sexual abuse (i.e., sexual interference, touching and exploitation).

The three-tiered system of sexual offences is based on the seriousness of harm and violence. Level 1 sexual assault occurs when any form of sexual activity without bodily harm is forced upon another person; level 2 sexual assault occurs when a person is sexually assaulted by someone who uses or threatens to use bodily harm or a weapon; and level 3 sexual assault occurs when a person wounds, maims, disfigures, beats or endangers the life of a person during a sexual assault.

Figure 12: Number and Rate of Sexual Offences, 1992 to 2001.



The intent of the law reforms was threefold: first, to reflect the violent rather than the sexual nature of the offences; second, to expand the opportunities for courts to receive children's testimony in cases of child sexual abuse; and, finally, to broaden the scope of sexual offences by presenting the offences as gender neutral as opposed to offences against females only.

The 4,010 sexual crimes reported in 2001 represent the lowest number of sexual crimes reported during the last 10 years.

Sexual Assault in 2001

In 2001, a total of 4,010 sexual assaults and other sexual offences were reported in British Columbia, a decrease of less than 100 offences or 2% from the 4,100 offences reported in 2000. The 4,010 sexual crimes reported in 2001 represent the lowest number of sexual crimes reported during the last ten years.

In 2001, 3,570 (89%) sexual crimes reported in B.C. were classified as level 1 sexual assaults, whereas 70 (2%) were level 2 and level 3 sexual assaults. Another 370 (9% of the total) were other types of sexual offences, such as sexual touching or interference, sexual exploitation and incest.

Of the 1,580 persons charged with sexual offences in 2001, 82% were male adults, 2% were female adults, 15% were male youths and 1% were female youths. These proportions have remained about the same over the last ten years.

The 2001 sexual offence rate is the lowest reported in more than ten years.

Sexual Assault Trends

A ten-year trend analysis of sexual offences reveals that the total number of reported offences peaked in 1993 at 6,500 and has been declining since that time. Despite the recent decreases, the number of reported sexual offences has grown substantially since the early 1980s, not only in B.C. but also across Canada.

This trend has likely been influenced by many factors, including higher levels of reporting, changes in societal attitudes toward the reporting of sex crimes, the reporting of historical sexual offences, and changes in federal legislation discussed above.

The sexual offence rate (the number of sexual offences per 1,000 population in B.C.) peaked at a high of 1.84 in 1992 and has been steadily declining since that time. Although the 2001 sexual offence rate of 0.98 is the lowest rate reported in more than ten years, it is still 25% higher than 20 years ago.

Sexual Assault Survey Results

The results from a survey conducted by Police Services Division of sexual assaults reported to police during 1993 and 1994 revealed the following characteristics of a typical reported sexual assault in B.C. The findings of this survey are available in full from Police Services Division's *Survey of Sexual Assaults Reported to Police in British Columbia, 1993-1994*.

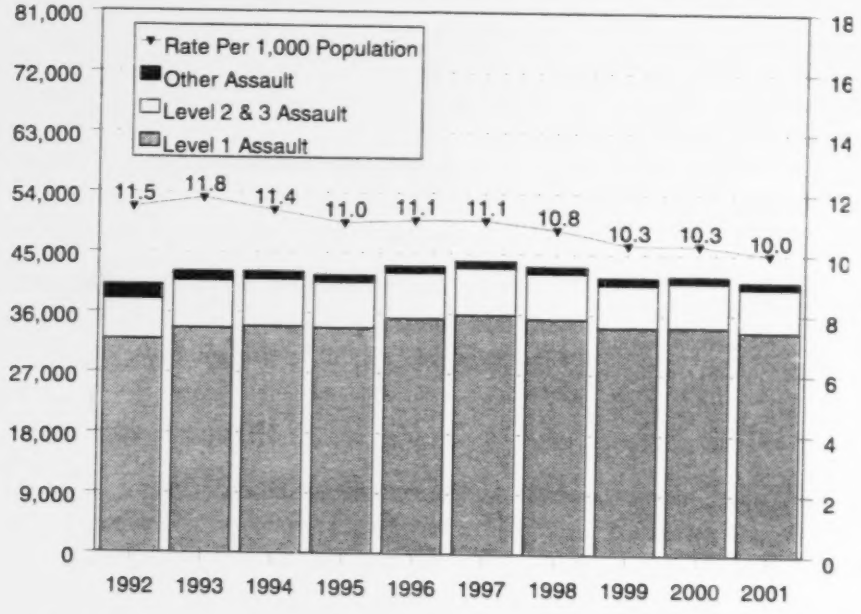
The victim is a female under the age of 19 (if under the age of 19 then the victim is likely to be between the ages of six and 12). The accused person is male, over the age of 17, and is either a family member or a friend of the victim. If the accused is a male relative of the victim, then he is most likely to be her father or stepfather. The offence occurred once or during a period of less than one month, and took place at the victim's home, the accused's home or a home shared by both.

Fifty percent of persons charged with a sexual assault have a previous criminal record; however, the record is likely not for violent or sexual offences. The police will clear (solve) the offence, most likely by recommending charges.

Non-Sexual Assault

As previously noted, revisions to federal assault legislation established three levels of non-sexual assault offences similar to those provided for sexual assaults. Level 1 non-sexual assault, the least serious of these offences, does not involve a weapon or serious physical injury; level 2 involves a weapon or results in bodily harm; and level 3 is aggravated assault or assault that is life-threatening. The ability of the police to make arrests and recommend charges in all types of assaults was enhanced by the legislation.

Figure 13: Number and Rate of Non-Sexual Assaults, 1992 to 2001.



Assaults accounted for 82% of violent crime reported in 2001.

In addition to these three types of assault, non-sexual assaults also include the offences of assaulting a police officer or other officer, shooting with intent (firing a gun, rifle or airgun with the intention of hurting or endangering the life of another person), and causing unlawful bodily harm (any intentional harm to another person by any means).

Non-Sexual Assault in 2001

In 2001, 40,950 assaults were reported. This represents a decrease of 750 offences (2%) over the 41,700 assaults reported in 2000. Non-sexual assaults accounted for 82% of the 49,860 violent crimes reported in B.C. in 2001.

In 2001, 33,480 (82%) of the total number of assaults were classified as level 1, compared with 6,210 (15%) as level 2 and 280 (less than 1%) as level 3 offences. Other assault offences accounted for the remaining 980 (2%) offences.

In 2001, 63% of assaults were cleared (solved), 42% were cleared by charge and 21% were cleared by other means.

Of the 17,140 persons charged with assault in 2001, 89% were adults and the remaining 11% were youths between 12 and 17 years of age. In the same year, males represented 84% of the adults charged and 67% of youths charged.

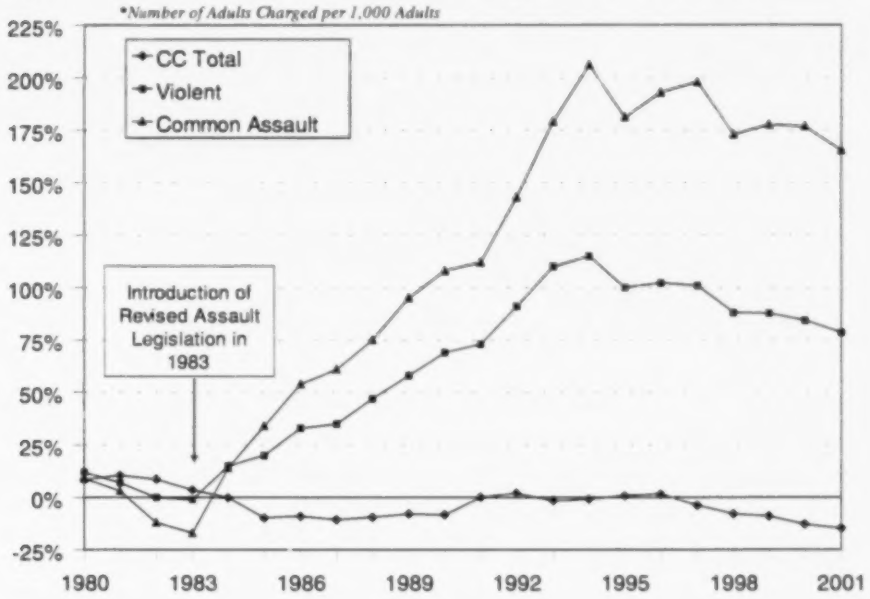
Non-Sexual Assault Trends

Overall, the number of assaults has remained relatively stable over the last ten years, ranging from a high of 43,850 in 1997 to a low of 40,070 in 1992 (rising 5% between 1992 and 2001). The number of level 1 assaults reported over the same 10-year period ranged from a high of 35,800 in 1997 to a low of 31,900 in 1992.

The overall increase in the number of level 1 assaults reported over the last ten years may reflect an increase in the occurrence of this type of offence. It may also be explained, at least partially, by increased reporting of these offences. In turn, increased reporting has likely been influenced by the changes in federal legislation discussed above.

In 2001, 63% of assaults were cleared (solved).

Figure 14: Adults Charged, % Change in Charge Rates 1980 to 2001.*



The rate of adults charged with level 1 assault and total violent crime grew at approximately the same pace as overall Criminal Code charge rates between 1980 and 1983. Starting in 1984, however, charge rates for level 1 assault and total violent offences grew much more rapidly, while the overall Criminal Code charge rate stayed relatively stable. This suggests that the changes made to federal assault legislation in 1984 contributed not only to an increase in the number of offences reported, but also to an increase in the rate of adults charged with assault.

Further evidence of the impact of the revised legislation on assault data is found in trends in charging patterns. A ten-year trend analysis indicates that after the legislative revisions, the proportion of assaults cleared by charge steadily increased, while there was a corresponding decrease in the proportion of assaults cleared by other means.

Non-Sexual Assault Survey Results

Police Services Division conducted a survey of non-sexual assaults reported to police during 1995. Based on the findings of the survey, the following description represents the characteristics of a typical reported level 1 (common) assault in B.C.

The victim is equally likely to be male or female and is most likely between the ages of 18 and 35. Eight out of ten accused are male and are most likely to be between the ages of 18 and 35. In two-thirds of the incidents the victim and accused know each other. Three out of ten level 1 assaults are spousal assaults. In almost half the incidents the assault takes place in the victim's home, the accused's home, or a home shared by both. One in ten assaults occur in a bar or restaurant.

More than half of the accused charged with level 1 assault have a prior criminal record, and 40% of those records are for a previous violent or weapons offence.

More than one-third of the incidents will be cleared by charge by the police. Crown counsel will proceed with police-recommended charges 85% of the time. In more than 40% of the incidents where charges are laid, the accused will be convicted of at least one criminal offence.

In the remaining incidents proceeded with by Crown, the accused is not convicted. For those charges that end in a non-conviction, charges are most frequently stayed (with or without a recognizance).

Spousal Assault

There is no Criminal Code offence known as spousal assault; rather, the determination that an offence is a spousal assault is based on the finding that an offender committed an offence (e.g., homicide, assault, criminal harassment) against his or her spouse. As such, the number of spousal assault incidents reported represents the number of Criminal Code incidents that contain supplementary information indicating that a crime against a spouse has occurred.

The determination that an offence is a spousal assault is based on the finding that an offender committed an offence against his or her spouse.

The number of spousal assault incidents does not necessarily count the number of different victims of a spousal assault. For example, if the same person is a victim of spousal assault at different times and has reported these crimes when they occurred, each incident would be recorded separately, and in effect the same victim would be counted more than once.

The reporting of spousal assault offences in British Columbia is supported by the provincial government's Violence Against Women in Relationships (VAWIR) policy. The VAWIR policy directs officials in the justice system (including police, Crown counsel, probation officers, victim assistance workers, and others) to emphasize the criminality of violence and to take the necessary measures to ensure the protection of women and children who may be at risk. The policy states that when attending an incident involving violence between spouses, where there are grounds to believe an offence has occurred, police officers should always make an arrest when it is in the public interest. The policy shifts the responsibility to lay

charges from the victim to the criminal justice system. The policy defines a spouse as a marital partner, a common-law partner or a partner in a dating or intimate relationship. Spousal assaults also include assaults between partners in same-sex relationships.

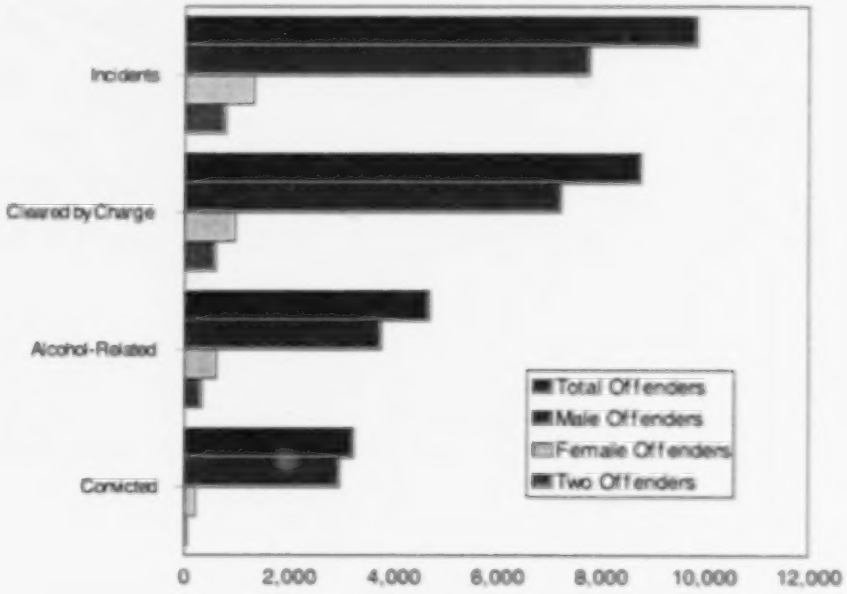
In 2002, the Attorney General of B.C. proposed revisions to the VAWIR policy. These proposed policy changes, which are under consideration as of the date of this publication, may impact data collection in the future.

Spousal Assault in 2001

In 2001, the spousal assault rate decreased to 2.41 spousal assaults per 1,000 population.

In 2001, there were 9,870 incidents of spousal assault reported in British Columbia, a 3% decrease from the 10,160 reported in 2000.

Figure 15: Spousal Assaults Reported to Police, 2001.



Spousal assault offences fall into three categories: incidents where the offender is male, incidents where the offender is female and incidents where both spouses are involved. In 2001, 78% of spousal assault incidents involved a male offender, 13% involved a female offender and 9% involved both spouses assaulting each other. These proportions have remained relatively constant since 1993.

Spousal assaults are primarily a subset of non-sexual assault offences. In 2001, Criminal Code assault offences associated with spousal assault incidents accounted for 23% of all assaults.

Although the majority of spousal assaults in 2001 involved the offence of non-sexual assault, there were almost 400 Criminal Code offences such as homicide, robbery, theft, and break and enter which also occurred in the context of a spousal assault.

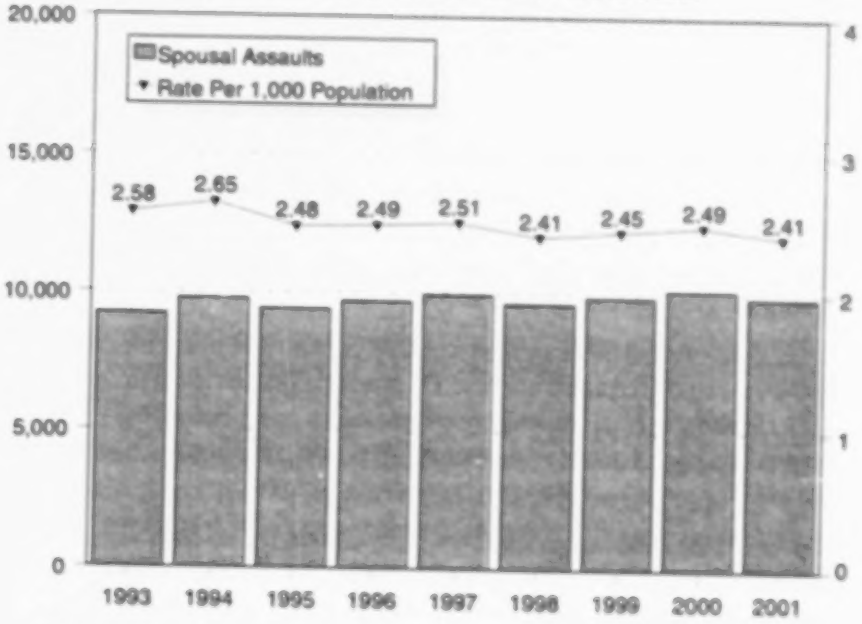
More than 90% of the 10,810 Criminal Code offences reported within spousal assault incidents were cleared during 2001. Over 80% of these offences were cleared by charge. Of the 8,670 persons charged, 6,990 (81%) were charged in incidents where the offender was male, 950 (11%) were charged in incidents where the offender was female, and 730 (8%) were charged in incidents involving both spouses. Almost 50% of all spousal assault incidents were alcohol-related.

Spousal Assault Trends

Between 1993 and 2001, the total number of reported spousal assault incidents fluctuated from a low of 9,200 reported in 1993 to a high of 10,120 in 2000. The spousal assault rate (number of spousal assaults per 1,000 population) remained relatively stable during the same period, averaging approximately 2.5 spousal assaults per 1,000 population. In 2001 the spousal assault rate was 2.41, a decrease of 3% from the 2000 rate of 2.49.

Between 1993 and 2001, the number of persons charged in incidents of spousal assault rose from 6,100 to 8,670, an increase of 42%.

Figure 16: Number and Rate of Spousal Assaults, 1993 to 2001.



The percentage of Criminal Code offences occurring within spousal assault incidents, which are cleared (either by charge or by other means), has remained steady at approximately 95% over the last nine years. The percentage of these crimes cleared by charge has climbed each year during the past nine years, rising from 62% reported in 1993 to 81% reported in 2001.

In 2001 the percentage of offences cleared by charge was considerably higher for spousal assault incidents (81% cleared by charge) compared to non-spousal assault incidents (42% cleared by charge). This trend has also been apparent during the past nine years. Overall, these data indicate that the police are recommending charges in cases involving violence in relationships.

There was also an overall increase in the number of persons charged in connection with spousal assault incidents during the past eight years. Between 1993 and 2001, total persons charged rose from 6,100 to 8,670 an increase of 42%.

The number of spousal assaults in which alcohol use was a factor has remained consistent at about 50% between 1993 and 2001.

Spousal Assault Survey Results

The results from a survey conducted by Police Services Division of spousal assaults reported to police during 1995 revealed the following characteristics of a typical reported spousal assault in B.C. (The findings of this survey are available in full from Police Services Division's *Survey of Spousal Assaults Reported to Police in 1995 in British Columbia*).

The number of spousal assaults in which alcohol use was a factor has remained consistent at about 50% between 1993 and 2001.

The victim is a female and is most likely between the ages of 25 and 35. The accused is male and similarly is most likely between the ages of 25 and 35. The victim and accused are in a common-law relationship and the offence took place in a home shared by the victim and accused. More than half of the incidents involved alcohol.

More than two-thirds of the accused charged have a prior criminal record and half of those records are for a previous violent offence.

Three-quarters of the incidents are cleared by charge by the police and Crown counsel approves nearly all these incidents. More than half of the incidents proceed on a single charge and that charge is most likely a level 1 assault (assault that does not involve a weapon or serious bodily harm).

In approximately half of the incidents proceeded with by Crown, the accused is convicted of at least one criminal offence. Of those charges that result in conviction, the offender is likely to receive a suspended sentence with probation, be incarcerated for a period of one to six months, or put on probation (with or without a fine).

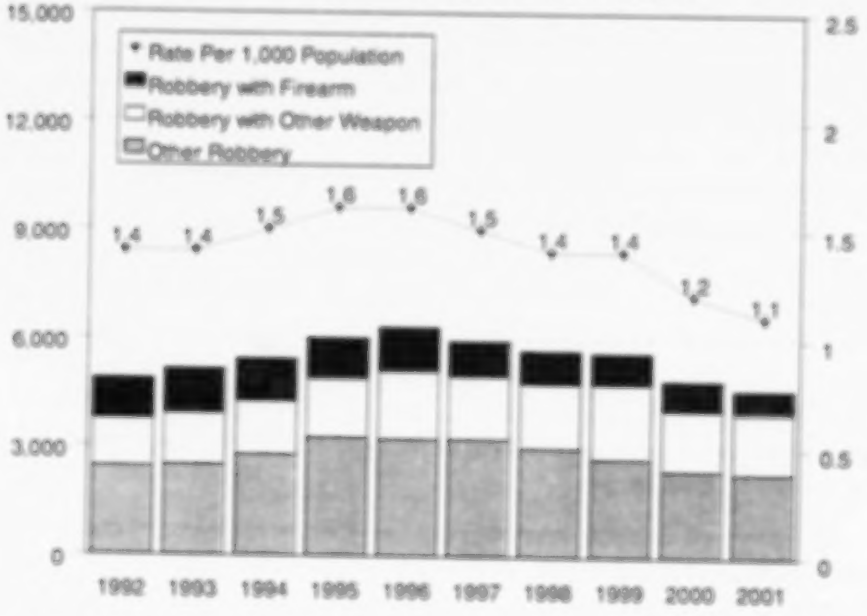
In the remaining incidents proceeded with by Crown, the accused will not be convicted. For those charges that end in a non-conviction, charges are most frequently stayed (with or without a recognizance).

Notably, many findings of Police Services Division's survey of spousal assaults parallel those reported in the 1998 Canadian Centre for Justice Statistics report, *Family Violence in Canada: A Statistical Profile*.

Robbery

Robbery offences are divided into three categories: robbery with a firearm, robbery with another weapon and other robbery. Other robbery includes assault with intent to steal (mugging) and stopping a mail conveyance with the intent to rob or search it.

Figure 17: Number and Rate of Robbery Offences, 1992 to 2001.



In 2001, there were 4,630 robberies reported, a decrease of 5% from 2000.

Unlike other violent crimes in which an offence is counted for every victim, only one robbery offence is counted per incident regardless of the number of victims in that incident.

After remaining relatively constant throughout the 1980s, the number of robberies increased steadily between 1992 and 1996. Beginning in 1997, however, the number of reported robberies has decreased. In 2001, there were 4,630 robberies reported, 5% less than in 2000 and 18% less than in 1999.

In 2001, 2,330 (50%) of the total number of robbery offences were classified as other robbery, compared with 1,660 (36%) as robbery with a weapon other than a firearm, and 640 (14%) as robbery with a firearm.

In 2001, 31% of robberies were cleared (solved). This is an increase from the 2000 clearance rate of 27%.

Adults comprised 79%, and young offenders accounted for 21% of the 1,610 persons charged with robbery in 2001. Males represented 88% of the total adults and youths charged with robbery.

Robbery Survey Results

In 1996, Police Services Division conducted a survey of robbery offences in British Columbia. The results of which were released in *B.C. Crime Trends Newsletter, Issue #3 (March 2000).*

Survey findings indicate that one-third of robberies occurred on a street, road or highway. An additional 9% occurred in other outdoor areas including parks, school grounds and parking lots. Approximately 8% of the robberies occurred at convenience stores, 8% in homes, 7% at banks, and 6% at gas stations.

Two-thirds of the surveyed victims were male and one-third were female. Approximately 27% of the victims were between the ages of 11 and 20 years while another 21% were between the ages of 21 and 30 years. A lone victim was involved in eight out of ten incidents. The victims were threatened in 32% of the surveyed incidents and physical force was used in 56% of the surveyed robberies. In approximately half of the incidents a weapon was used during the robbery. Of these incidents, 41% of the weapons were knives and 27% were firearms.

In 2001, males represented 88% of persons charged with robbery.

In eight out of ten surveyed robberies the accused was male. Youths (between the ages of 12 and 17 years) were identified as accused persons in 30% of the robberies while an additional 32% of the accused were between the ages of 18 and 25 years. Half of the robberies involved a lone accused, while another 28% involved two accused persons.

Of the surveyed incidents, approximately one-third were cleared by charge (solved) and the remaining two-thirds were not cleared (unsolved). An accused was not identified in almost all of the incidents that remained unsolved.

Abduction

There are four separate categories of abduction, each of which refers to the removal of a child from the parent or guardian's care. These offences are different from the offence of kidnapping, which refers specifically to the forcible removal or confinement of a person regardless of age or relationship. Abduction is characterized by behaviours such as unlawfully taking, enticing away, harbouring, or concealing a young person.

The current laws regarding abduction were enacted in 1983; they replaced sections of the Criminal Code that were only applicable to the abduction of females under a specific age.

The four categories of abduction are as follows: abduction of an unmarried person under the age of 16 against the will of a parent or guardian; abduction of a person under the age of 14 with the intent of depriving the parent or guardian of possession of the child; abduction by a parent or guardian of anyone under the age of 14 in contravention of a custody order, with the intent to deprive the person with legal custody of having custody of the child; and abduction of a person less than 14 years of age by a parent or guardian where there is no custody order, with the intent to deprive the other parent of the child.

In 2001, there were 94 abduction offences, of which 33% were abductions of children under the age of 14, 33% were abductions in contravention of a custody order, 26% were abduction of a child under 14 (without a custody order), and the remaining 8% were abductions of persons under the age of 16. Over the past ten years, there was an average of 116 abductions each year in British Columbia.

In 2001, 51% of abductions were cleared (solved). The average clearance rate for abduction offences from 1992 to 2001 was 54%. During 2001, 35% of abductions were cleared by charge while 16% were cleared by other means. Of those offenders charged with abduction in 2001, 37% were male, and 63% were female.

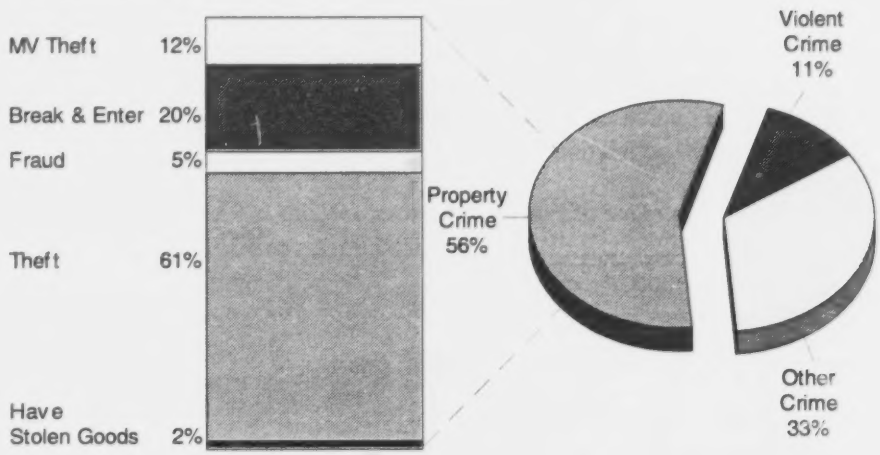
Over the past 10 years there has been an average of 116 abductions each year in B.C.

Other Crimes Against Persons

There are other Criminal Code offences that are not included in the violent crime category, but may constitute a crime against another person (as opposed to property). The most evident of these offences is criminal harassment. Within the federally prescribed method of coding criminal offences for the UCR Survey, criminal harassment crimes are included in the "other" crime category. Consequently, criminal harassment is discussed in more detail in Chapter 4.

Property Crime in British Columbia

Figure 18: Property Crime by Category, 2001.



Property crimes represented 56% of all Criminal Code offences reported in British Columbia during 2001. These crimes include break and enter, motor vehicle theft, other theft (such as shoplifting, theft of bicycles, theft from motor vehicles) as well as fraud and possession of stolen property. Because three out of five reported crimes are property offences, these offences have a greater impact on B.C.'s crime trends than other types of crime.

Property Crime in 2001

In 2001, police reported 264,220 property crimes, an increase of 2% compared with the 259,410 offences reported in 2000.

Most property crimes are either thefts or break and enter offences. In 2001, there were 161,490 reported thefts and 51,920 break and enter offences. These two offence categories together represented 81% of all property crimes and 46% of total Criminal Code offences in 2001.

In 2001, 27,020 persons were charged with property crimes. Approximately 81% of total persons charged were adults and 19% were youths between 12 and 17 years of age. Males represented 77% of total persons charged and females represented 23%. These percentages have remained about the same over the last ten years.

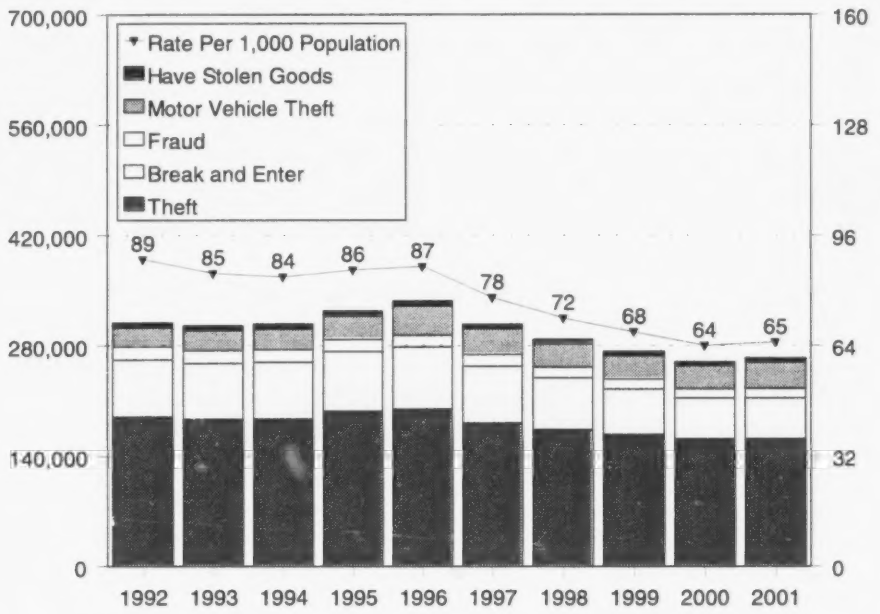
Property Crime Trends

After remaining fairly stable during the 1980s, the number of property crimes in B.C. increased from 308,690 in 1992 to 336,750 in 1996. This represented an increase of nearly 28,000 offences or 9%. After reaching an all-time high of 336,750 offences in 1996 the number of property crimes decreased by 47,700 offences or 16% from 1997 to 2000. There were 264,220 offences reported in 2001, an increase of 2% from the 259,420 reported in 2000.

The property crime rate remained relatively constant throughout the 1980s, averaging about 80 offences per 1,000 population. It rose to 90 offences per 1,000 population in 1991, but began to decrease after that time, falling to a four-year low of 84 offences per 1,000 population in 1994. Slight increases were reported in the property crime rate in 1995 and 1996, but since that time the property crime rate has decreased substantially. Between 1996 and 2001, the property crime rate decreased by 25% from 87 offences per 1,000 population to 65 offences per 1,000 population.

The number of offences cleared (solved) is low for most property crimes. In 2001 only 14% of property crimes were cleared.

Figure 19: Number and Rate of Property Offences, 1992 to 2001.



The number of offences cleared (solved) is low for most property crimes. Over the last ten years, clearance rates have continued to decline. In 2001, only 14% of property crimes were solved, compared with 18% in 1992. From 1993 to 1999, the rate remained consistent at 17%. Since 1999, however, the clearance rate for property crimes has declined almost 18%.

Break and Enter

Break and enter offences are divided into three categories: residential, business, and other break and enters. Other break and enter offences include break and enter of trains, boxcars, unattached trailers or storage lockers.

Break and Enter in 2001

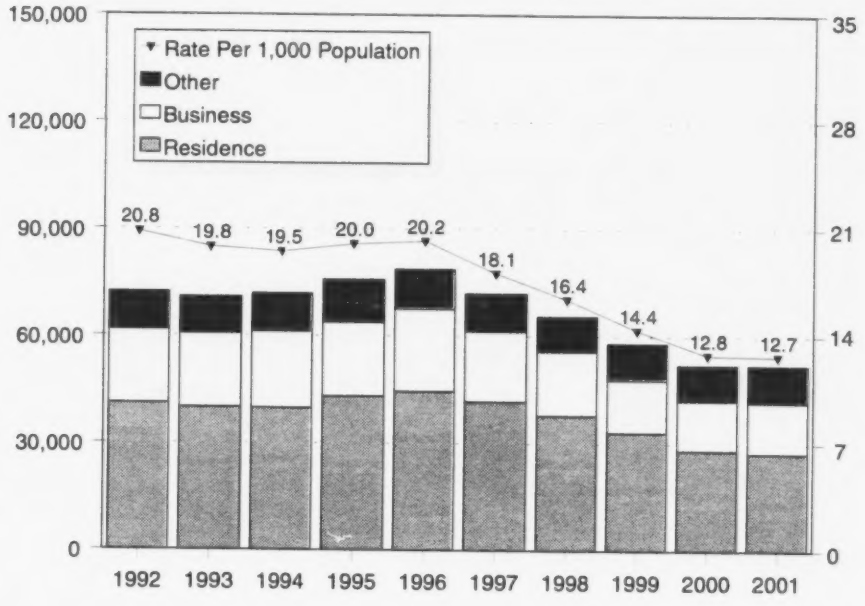
The number of break and enter offences remained stable in 2001 at 51,920, a decrease of less than 100 offences or 1% from the 51,980 reported in 2000.

During 2001, 53% of the total break and enter offences occurred in homes, 27% in businesses, and 20% in other premises. Break and enter offences accounted for 20% of all property crime and 11% of all Criminal Code offences in 2001.

In 2001, 63% of the 4,260 persons charged with breaking and entering were male adults, 6% were female adults, 28% were male youths, and the remaining 3% were female youths.

In 2001, the break and enter crime rate reached a 10 year low of 13 per 1,000 population.

Figure 20: Number and Rate of Break and Enter Offences, 1992 to 2001.



Break and Enter Trends

Throughout the 1980s and into 1990, the number of break and enter offences fluctuated between 56,700 and 63,000. The number of offences increased by 15% in 1991 and by another 5% in 1992, reaching a five-year high of 72,200 offences. The number of break and enter offences levelled off between 1992 and 1994, then increased again during 1995 and 1996. However, between 1996 and 1998 the number of reported break and enter offences declined by 13,000 offences, or 16%. From 1998 to 2000, the number of break and enter offences decreased by a further 13,000 offences representing an additional decline of 20%. In 2001, however, the trend stabilized at 51,920 offences, a less than 1% decrease from 2000.

The rate of break and enter offences per 1,000 persons has fluctuated during the past ten years, peaking at a high of 21 break and enters per 1,000 persons in 1992 and falling to a low of 13 break and enters per 1,000 persons recorded in 2000 and 2001.

The clearance (solved) rate for break and enter offences has averaged approximately 10% over the past ten years. The clearance rate for break and enter offences during 2001 was 9%.

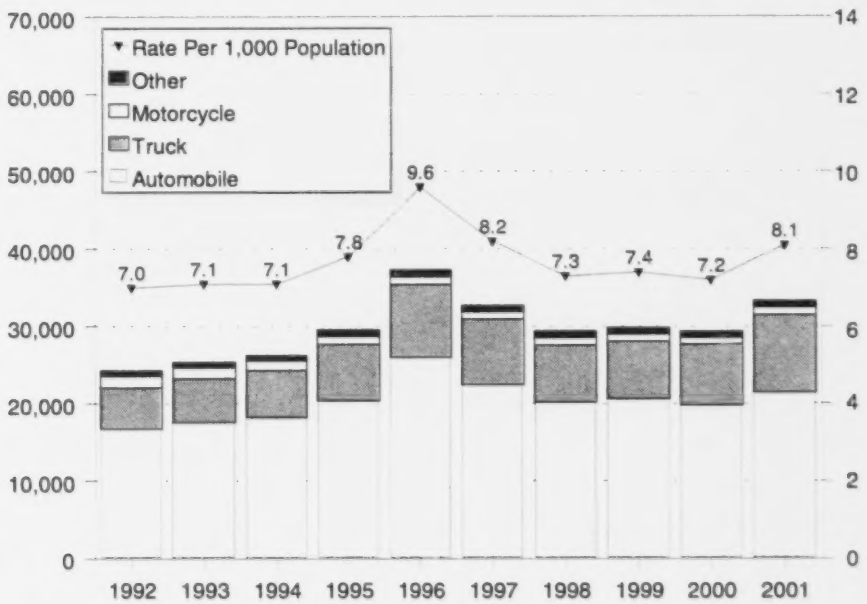
Motor Vehicle Theft

Motor vehicle theft data include theft or attempted theft of automobiles, trucks, motorcycles and other vehicles (such as snowmobiles, farming and industrial implements, and all terrain vehicles). Most stolen vehicles are cars or trucks.

In the spring of 1998, a joint task force to combat auto crime in British Columbia was created.

In 1998, police officers from the RCMP and Lower Mainland municipal police departments began work on the Auto Theft Task Force (ATTF). The ATTF's priorities include targeting offenders who are stealing vehicles for thrill seeking purposes; crimes in which vehicles are stolen and disposed of offshore or in other parts of Canada, or taken to "chop shops" for dismantling; and crimes in which vehicles are stolen and then used in the commission of further criminal offences.

Figure 21: Number and Rate of Motor Vehicle Thefts, 1992 to 2001.



Motor Vehicle Theft in 2001

There were 33,240 motor vehicle thefts reported in 2001 representing an increase of 3,900 offences or 13% from 2000. Of the 33,240 motor vehicle thefts reported in 2001, 65% were cars, 30% were trucks and the remaining 5% were motorcycles or other vehicles.

Only 6% of motor vehicle thefts were cleared (solved) during 2001. Of the 1,770 persons charged with motor vehicle theft in 2001, 63% were male adults, 6% were female adults, 25% were male youths, and the remaining 6% were female youths.

Adults accounted for 70% of persons charged with this type of offence while youths represented 30%. However, since more than 90% of motor vehicle thefts in 2001 remained unsolved, generalizing about the characteristics of offenders is difficult.

Motor Vehicle Theft Trends

Between 1992 and 2001, the number of reported motor vehicle thefts increased 37% or 8,970 offences. Similar to other types of property crime, the number of motor vehicle thefts remained fairly constant during the 1980s until 1990 and 1991 when the number of offences increased by 33% and 17% respectively.

During the next three years, motor vehicle thefts levelled off and then increased again by 13% in 1995 and 26% in 1996. The number of reported motor vehicle thefts declined between 1996 and 1997 (by 12%) and declined again between 1997 and 2000 (by 10%). However, the first reported increase in motor vehicle thefts occurred in 2001, with an increase of 3,900 offences or 13% rise over 2000.

Between 1992 and 2001, the number of reported motor vehicle thefts increased by 37%.

The rate of motor vehicle thefts per 1,000 population remained relatively constant from1992 to 1994, and from 1998 to 2000. Peaks in the motor vehicle theft rate occurred in 1995 and 1997 and again in 2001.

The clearance (solved) rate for motor vehicle theft decreased from 12% in 1992 to 6% in 2001. Although the clearance rate is low, about 95% of stolen vehicles are recovered. However, many of these vehicles are damaged by the offender breaking into the vehicle, driving carelessly, or removing parts for resale.

Theft

Theft, including attempted theft, is divided into four categories: theft of bicycles, theft from motor vehicle, shoplifting and other theft. Other theft includes offences such as theft of electricity or gas, theft of data or computer software, illegal use of pay-TV descramblers and computer-aided long-distance calls. Theft accounts for 61% of all property crime and 34% of all Criminal Code offences.

Every theft is classified according to the value of the goods stolen. From 1986 to 1994, thefts were divided into over and under $1,000 categories. In 1995 these categories were revised to theft over and under $5,000. Since 1995, the theft under $5,000 category has represented approximately 98% of total theft offences. This section describes the data concerning theft but does not distinguish between the over and under theft categories.

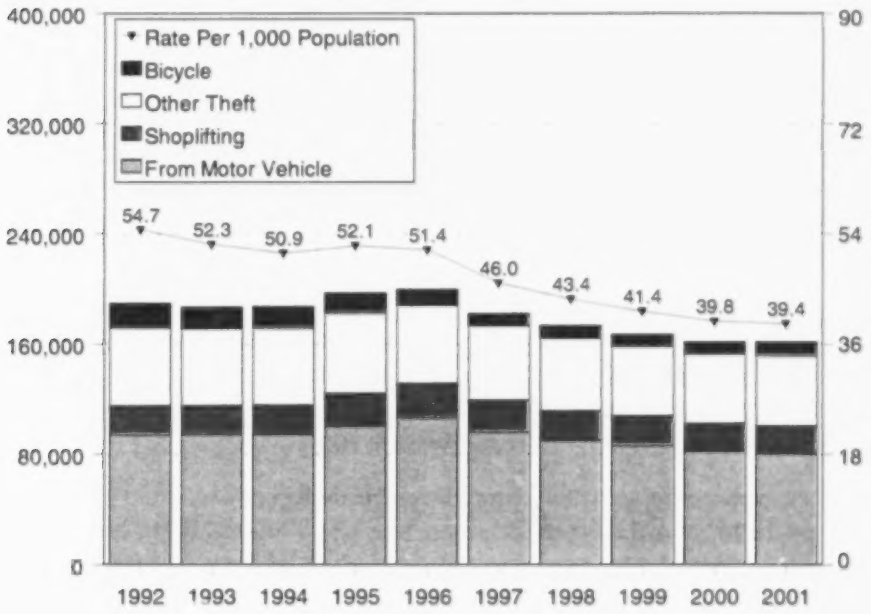
Theft in 2001

In 2001, there were 161,490 thefts reported to the police. Although this represents no increase or decrease when compared with the number of thefts reported in 2000, it does represent a decrease of 3% from the 166,830 offences reported in 1999.

As in previous years, thefts from motor vehicles accounted for just over half of all thefts in 2001, while approximately 32% were other thefts, 12% were shoplifting crimes and 6% were bicycle thefts.

Of the 15,500 persons charged with theft in 2001, 61% were male adults, 22% were female adults, 10% were male youths and 7% were female youths.

Figure 22: Number and Rate of Thefts, 1992 to 2001.



Theft accounts for 61% of all property crime, and 34% of all Criminal Code offences.

Theft Trends

Like other property crimes, the number of thefts remained stable through the 1980s, then rose steeply in 1990 and 1991. Since 1996, the number of thefts have steadily declined. Most of the increases in 1990 and 1991 were due to the growth in the number of thefts from motor vehicles.

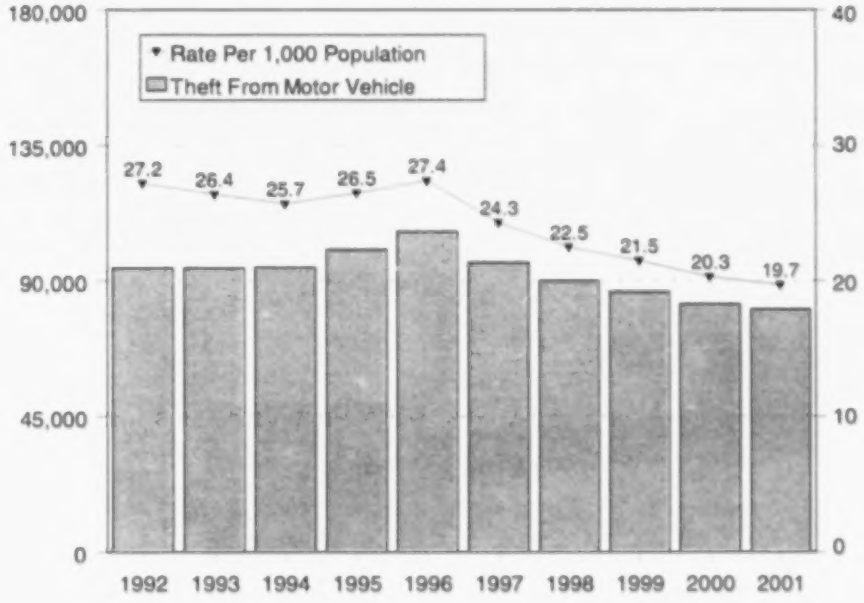
Although the number of reported thefts fluctuated between 1992 and 2001, the clearance (solved) rate has remained relatively stable, averaging 15%. The number of persons charged with theft also remained stable, averaging 19,000 per year.

Bicycle thefts represented 6% of total thefts in 2001. Over the last ten years, bicycle thefts have declined almost 50%, from 18,000 in 1992 to 10,000 in 2001.

After steadily increasing between 1992 and 1996, the number of shoplifting offences dropped 8% between 1996 and 1997 and decreased 7% in 1998. The number of shoplifting offences remained relatively constant between 1998 and 2000, with a decrease of 1% reported in 2001.

The number of thefts from motor vehicles climbed steadily from 1989 to 1991 and levelled off between 1992 and 1994. Thefts from motor vehicles peaked in 1996 at 27 offences per 1,000 persons and have been decreasing steadily since that time. Between 1996 and 2001, thefts from motor vehicle declined by 13,600 offences or 14%.

Figure 23: Number and Rate of Thefts From Motor Vehicles, 1992 to 2001.



Have Stolen Goods

A total of 5,340 "have stolen goods" (also known as possession of stolen property) offences were reported during 2001, an increase of 540 offences or 11% over the 4,800 offences reported in 2000. The number of possession of stolen property offences remained constant during the early 1990s, rising to a 10-year high of 6,300 offences in 1994. Between 1994 and 2000, possession of stolen property offences declined by 23%.

Of the 3,150 persons charged with possession of stolen property in 2001, 84% were males and 86% were adults.

Due to the nature of these offences, clearance rates are high. In 2001, 72% of possession of stolen property incidents were cleared; 60% were cleared by charge and 12% were cleared by other means. Over the last ten years, an average of 82% of possession of stolen property offences were cleared.

Bicycle thefts represented 6% of total thefts in 2001. Over the last 10 years, bicycle thefts declined 50%, from 18,000 in 1991 to 10,000 in 2001.

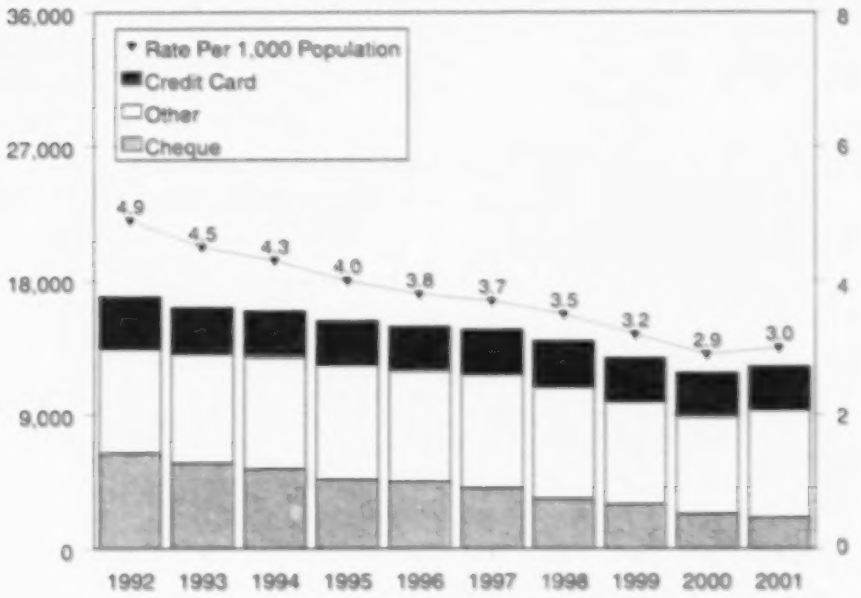
Fraud

Fraud offences are reported under three categories: cheque, credit card and other fraud. Other fraud includes offences such as criminal breach of trust, real estate fraud, and forgery.

There were 12,230 fraud offences in 2001, an increase of 4% from the 11,790 offences reported in 2000. From 1992 to 2000, however, the number of fraud offences declined by approximately 3% each year.

There were 12,230 fraud offences in 2001, an increase of 4% from the 11,790 offences reported in 2000.

Figure 24: Number and Rate of Fraud Offences, 1992 to 2001.



Of the 2,340 persons charged with fraud in 2001, 68% were male adults, 27% were female adults, 3% were male youths and 2% were female youths.

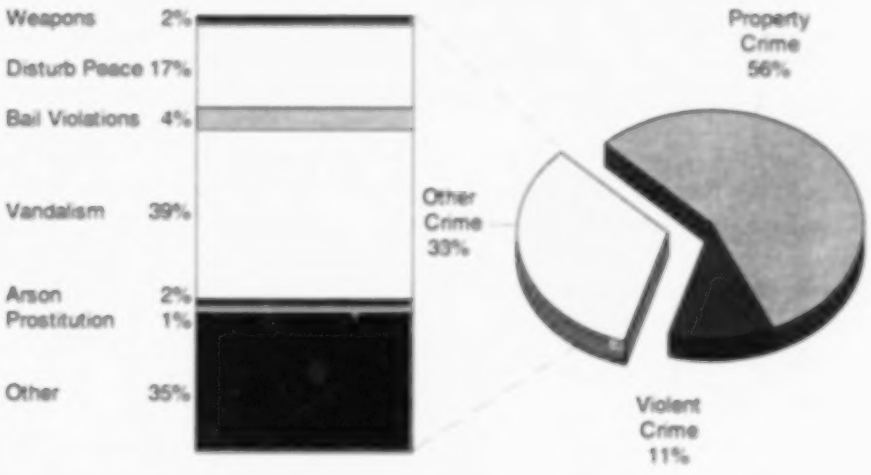
Clearance rates are relatively high for this type of offence, fluctuating between 58% and 35% over the last ten years. Of the 4,330 offences cleared (solved) in 2001, 23% were cleared by charge and 12% were cleared by other means.

Other Crime in British Columbia

CHAPTER 4

OTHER CRIME

Figure 25: Other Crime by Category, 2001.



Approximately 33% of all Criminal Code offences fall within the category of "other" crime. These other crimes include prostitution, gaming and betting, possession of offensive weapons, arson, disturbing the peace, trespassing, mischief and property damage (vandalism), criminal harassment, and miscellaneous other Criminal Code offences (a catch-all category of offences for which specific data collection codes do not exist).

In 2001, there were 154,000 other crimes, a 3% increase from the 149, 200 other offences reported in 2000.

From 1992 to 1999, the number of reported other crimes steadily declined by an average of 3% per year. From 1999 to 2001, however, the number of reported other crimes increased by 8% from 142,960 in 1999 to 154,000 in 2001.

In 2001, of the total other crimes reported, 60,330 or 39% were mischief and property damage (vandalism). Another 28,820 offences, or 19%, were disturbing the peace offences. Together these offences represent almost 60% of all other crimes.

The clearance (solved) rate for other offences was 33% in 2001. Although this represents a decrease from the 2000 clearance rate of 36%, it is comparable to the average clearance rate of 35% over the previous ten years. Clearance rates for other crimes are largely influenced by the volume of mischief and property damage offences which traditionally have low clearance rates.

Of the 17,430 persons charged with other crimes during 2001, 84% were adults and 16% were youths between 12 and 17 years. Males represented 87% of total persons charged.

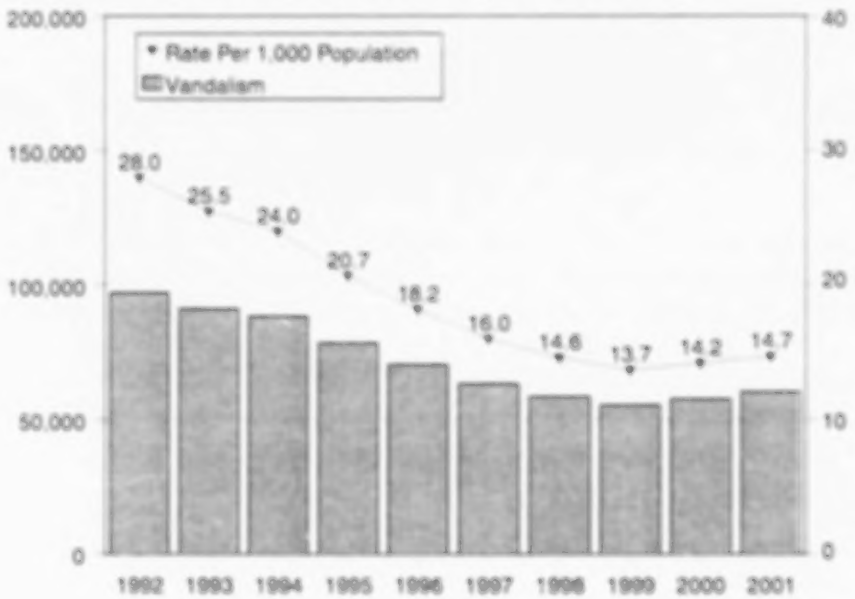
Mischief and Property Damage (Vandalism)

The offence of mischief and property damage is often called vandalism. It includes incidents where property is destroyed or damaged, acts where property is rendered dangerous or inoperative, or acts that render access to property denied or obstructed. Similar to thefts, mischief and property damage offences are classified according to their value. From 1986 to 1994, mischief and property damage offences were divided into over and under $1,000 categories. In 1995, these categories were revised to over and under $5,000. Since the 1995 revisions, most offences in this category have been reported as mischief and property damage under $5,000.

In 2001 a total of 60,330 mischief and property damage offences were reported, an increase of 5% from 2000.

This section describes the data concerning mischief and property damage but does not distinguish between the over and under categories.

Figure 26: Number and Rate of Vandalism Offences, 1992 to 2001.



In 2001, a total of 60,330 mischief and property damage offences were reported. This is a 5% increase from the 57,620 offences reported in 2000.

In 1992 there were 97,100 mischief and property damage crimes reported, a 10-year high. From 1992 to 1999, the total number of reported mischief and property damage offences steadily declined by an average of 6% per year, then increased by 4% in 2000 and an additional 5% in 2001.

Of the 2,450 persons charged with mischief and property damage crimes in 2001, 1,590 or 65% were adults and 860 or 35% were youths. Males represented almost 90% of total persons charged.

Clearance rates are low for this type of offence, fluctuating between 14% and 9% over the past decade. Of the 6,860 offences cleared (solved) in 2001, 4% were cleared by charge and 8% were cleared by other means.

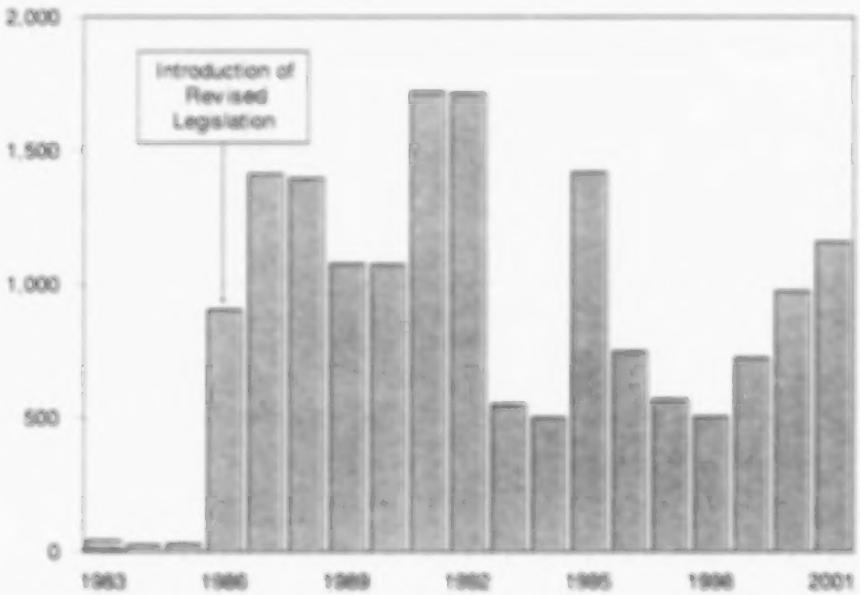
In 2001, mischief and property damage offences represented 13% of total Criminal Code offences, a decrease from 1992, when these offences accounted for one-fifth (20%) of total crime.

Prostitution

Prostitution offences are classified into three categories: keeping a bawdy house, procuring, and other prostitution offences. The offence of keeping a bawdy house occurs when premises are used for prostitution. Procuring, commonly called pimping, is the offence of enlisting or attracting, by any means, a person to engage in prostitution. Other prostitution offences include incidents in which a person stops or communicates with another person in a public place for the purposes of prostitution.

Changes in reported prostitution offences are highly sensitive to changes in police enforcement practices.

Figure 27: Number of Prostitution Offences, 1983 to 2001.



In 2001, there were 1,160 reported prostitution offences, an increase of 19% from the 975 prostitution offences reported in 2000. Approximately 91% of these crimes were for other prostitution offences, 7% were for procuring and the remaining 2% for keeping a bawdy house.

Four out of five prostitution offences were reported in core urban areas, i.e., Vancouver, Nanaimo, Surrey, and Prince George.

In 2001, 344 persons were charged with prostitution offences, 29% less than in 2000. Male adults accounted for 52% of persons charged, while female adults accounted for 46%. Female youths represented the remaining 2%.

With the introduction of Bill C-49 (covering public communication for the purposes of prostitution) in 1986, the number of prostitution offences increased

substantially over previous years. The number of offences peaked in 1991 and 1992, when 1,700 offences were reported in each of these years, and then declined to a low of 500 offences reported in 1994. In 1995, the number of prostitution offences more than doubled compared with 1994, but then decreased by 47% in 1996, and decreased by an additional 33% from 1996 to 1998. From 1999 to 2001, however, the number of prostitution offences has increased 60% from 726 in 1999 to 1,160 in 2001. It is important to stress that changes in prostitution offences are highly sensitive to changes in police enforcement practices.

Offensive Weapons

The Firearms Act mandates the licensing of all gun owners by January 2001 and the registration of all guns by January 2003.

In 1998, the new federal Firearms Act was implemented. The Act mandates the licensing of all gun owners by January 1, 2001 and the registration of all guns by January 1, 2003. The new Act sets out licensing requirements for all firearms, including enhanced screening procedures, spousal notification, and safety training. The registration of firearms is geared toward the tracking of legal firearms in order to assist in the identification of illegal guns.

Figure 28: Percentage of Weapons Offences, 2001

As a reflection of legislative changes, the offence categories for weapons have been modified. These categories are now firearms usage, weapons possession, trafficking import/export, and other weapons offences. Until 1999, offensive weapons crimes were divided into four offence categories: explosives, prohibited weapons, restricted weapons and other weapon offences. The new categories are not comparable with the previous offence categories.

In 2001, there were 3,880 weapons offences reported, an increase of 18% from the 3,300 reported in 2000. Of these offences, 2,320 or 60% were for weapons possession while an additional 1,190 offences or 31% were for "other" weapons offences. There were 360 firearms usage offences (9%) and 14 trafficking or importation offences (representing less than 1%).

Of the 1,130 persons charged with weapons offences in 2001, 75% were adult males, 6% were adult females, 16% were male youths, and 3% were female youths.

Clearance rates are relatively high for this type of offence. In 2001, 2,210 (56%) weapons offences were cleared, 1,100 (28%) by charge and 1,110 (28%) by other means.

Offensive Weapons Trends

What follows is a discussion of trends regarding weapons offences for the seven years prior to the change in both weapons legislation and in the way weapons offences are categorized.

In 1997, after three consecutive years of decreases, the total number of weapons offences increased by 8% over the 1996 total. An increase was reported again in 1998 when the total number of weapons offences rose by 11%. This increase is largely a result of a rise in the number of prohibited weapon offences.

The explosives category includes illegal importation, possession, storage and use of explosives such as dynamite and fireworks, as well as the threat of the use of explosives (i.e., bomb threats). In 1985, possession of an explosive weapon was broadened to include the possession of any explosive substance.

The number of explosives offences is small and has fluctuated considerably over the past ten years. In 1998, there were 205 explosives offences reported to the police, 58 more offences than the 147 reported in 1992.

In 2001, there were 3,880 weapons offences reported, an increase of 18% over 2000.

Prohibited weapons offences include the possession, concealment and importation of non-firearms such as spring knives or switchblades, nunchaka sticks, throwing stars, slingshots, and silencers for handguns. In 1998, there were 1,047 reported prohibited weapons offences, representing an increase of 61% over the 651 prohibited weapons offences reported in 1997, and a 47% increase from the 712 reported in 1992.

Restricted weapons offences include the possession, improper storage and importation of firearms such as handguns, altered guns (sawed-off rifles or shotguns) and fully automatic guns. The number of restricted weapons offences has fluctuated over the ten year period from 1989 to 1998. In 1998, 296 restricted weapons offences were reported, a 22% decrease from the 379 reported in 1997, and a 37% decrease from the 469 reported in 1992.

Other weapons offences include crimes related to the concealment, importation, possession, storage, and licensing of weapons. Also included in this category are incidents where a firearm is carelessly discharged in a non–life–threatening manner. The number of offences reported in this category has increased steadily from 1,600 offences in 1989 to 2,100 in 1998. This represents an increase of 35% over the ten year period.

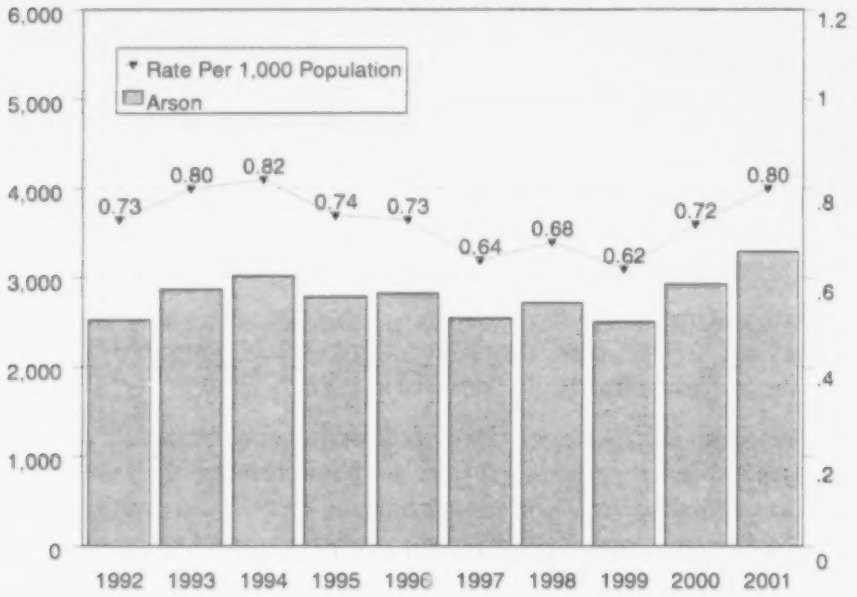
Overall, the number of offensive weapons offences cleared (solved) averaged 75% from 1989 to 1998. In 1998, 32% of weapons offences were cleared by charge and 42% were cleared by other means.

Of the 994 persons charged with offensive weapons offences in 1998, 77% were male adults, 4% were female adults, 17% were male youths, and 2% were female youths.

Arson

Before 1990, arson was more narrowly defined than it is today. With the proclamation of Bill C-53 in July 1990, the definition of arson was expanded and the penalties became more serious. Besides causing damage to specific types of property, arson now includes wilful disregard for the lives and safety of others and negligent conduct that results in fires or explosions. It also criminalizes the possession of flammable or incendiary materials.

Figure 29: Number and Rate of Arson Offences, 1992 to 2001.



In 2001, 3,290 arson offences were reported, a 13% increase from 2000.

Mischief arson, such as setting fire to abandoned cars or waste receptacles, was previously reported as mischief and property damage. Under the new legislation, these offences are now reported as arson. This resulted in a significant increase in the number of arson offences recorded since 1990.

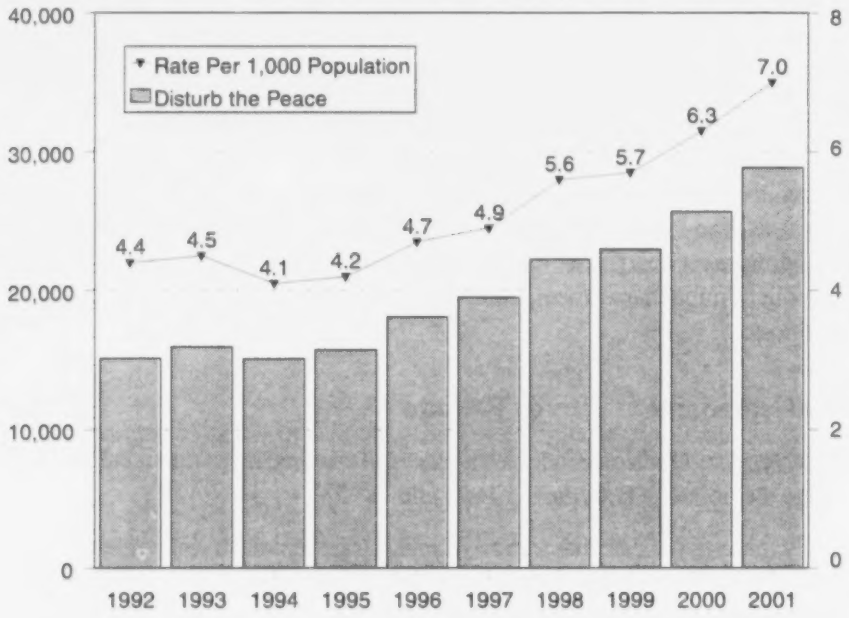
From 1986 to 1990, the number of arson offences remained about the same in each year. Following revisions to arson legislation, the number of arsons nearly doubled, from 1,200 offences reported in 1990 to 2,300 in 1991. From 1992 until 1994, the number of arson offences continued to increase, albeit at a much slower rate. Between 1995 and 1996, the number of arson offences levelled off. From 1997 to 2000, arson offences have fluctuated, but on average have increased by 5% each year. In 2001, 3,290 arson offences were reported, a 13% increase from the 2,920 reported in 2000. Despite increases over the last decade, the arson offence rate has never exceeded one offence per 1000 persons.

Before 1991, approximately 20% of arson offences were cleared. Since that time, the average clearance rate has dropped to approximately 14%. This decrease in clearance rates is largely due to the wider definition of arson.

Disturbing the Peace

Disturbing the peace is defined as causing a disturbance in or near a public place. A "disturbance" includes behaviour such as fighting, making loud noise, using obscene language, and being drunk and disorderly.

Figure 30: Number and Rate of Disturb the Peace Offences, 1992 to 2001.



Rather than proceeding under the Criminal Code, police often deal with incidents of disturbing the peace as offences under provincial statutes or municipal bylaws. This allows police to address these crimes through the municipal and provincial ticketing process.

In 2001, there were 28,820 Criminal Code disturb the peace offences reported, representing an increase of 12% from 2000. The number of reported disturb the peace offences has fluctuated somewhat during the ten year period between 1992 and 2001, but has increased on average approximately 5% each year. In 2001, 42% of disturbing the peace offences were cleared.

Police often deal with incidents of disturbing the peace through the municipal and provincial ticketing process.

Criminal Harassment

In 1993, the Criminal Code was amended to include the offence of criminal harassment. Criminal harassment, more commonly known as stalking, prohibits harassing and intimidating conduct that causes a person to fear for his or her safety or the safety of anyone known to him or her.

Criminal harassment is a distinct form of criminal activity involving a series of actions as opposed to a single isolated event. When these actions are considered individually, they often do not constitute a crime (for example, sending notes or flowers). It is when these activities instill fear of injury that they represent a pattern of behaviour that is considered criminal.

Criminal harassment legislation prohibits harassing and intimidating conduct that causes a person to fear for his or her safety.

During 2001, approximately 4,120 criminal harassment offences were reported in B.C., a less than 1% decrease from the 4,150 reported in 2000. Over 80% of criminal harassment charges were cleared (solved) and about 2,800 persons were charged with criminal harassment. Male represented 90% of persons charged with these offences.

Criminal Harassment Survey Results

Police Services Division conducted a survey of criminal harassment incidents reported to the police in B.C. during 1995 and 1996.

Survey findings indicate that victims of stalking are female in eight of ten incidents and that the accused are male in eight of ten incidents. Both the victim and the accused are likely to be between the ages of 25 and 45. The harassment occurs at either the victim's home or the victim's place of work in seven out of ten incidents. In nearly half of the incidents there is an intimate relationship between the victim and the accused. When there is an intimate relationship between the parties, in nine of ten incidents, the offender is an ex-boyfriend or an ex-spouse of the victim.

About two-thirds of the incidents are cleared (solved). One-third of incidents are cleared by charge while another third are cleared by other means.

More than half of the accused charged with criminal harassment have prior criminal records. Of those accused persons with prior criminal records, half have a record for violent offences and one in four have a record for weapons offences.

Miscellaneous Other Criminal Code Offences

Those Criminal Code offences that do not have specific data collection codes are grouped in the category of "miscellaneous other" offences.

In 2001, there were 36,800 miscellaneous other Criminal Code offences reported, representing a decrease of 2% from 2000. In 2001, 48% of miscellaneous other offences were cleared (25% were cleared by charge and 23% were cleared by other means).

Police Services Division conducted a survey of miscellaneous other offences in 1995 to determine the types of crimes that fall into this category. Results showed that 55% of the offences were uttering threats and 29% were harassing or indecent phone calls. Applications for peace bonds or restraining orders were the next largest category at 4%. The remaining 12% were various offences, including breach of peace, cruelty to animals, unlawfully in dwelling house, and possession of break-in instruments.

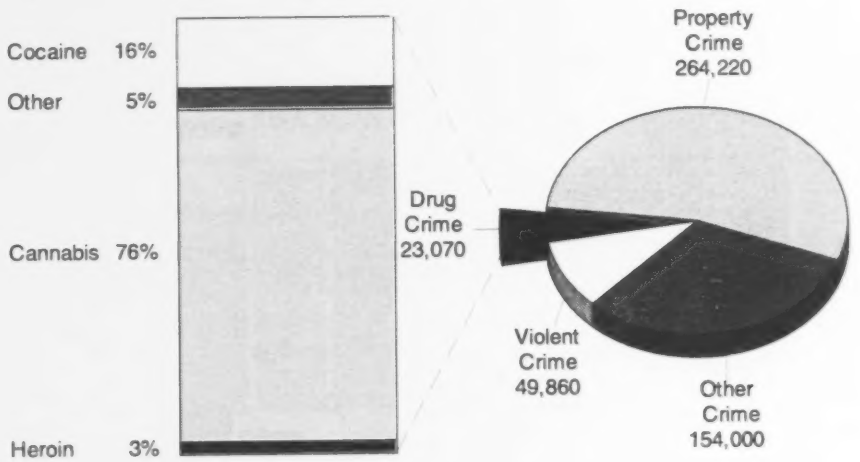
In 2001, 48% of miscellaneous other Criminal Code offences were cleared (solved).

Drug Crime in British Columbia

CHAPTER 5

DRUG CRIME

Figure 31: Drug Crime by Category, 2001.



Prior to 1997, offences involving drugs fell under two federal statutes: the Narcotic Control Act (NCA) and the Food and Drugs Act (FDA). The Narcotic Control Act dealt with illicit drugs and the Food and Drugs Act covered controlled and restricted drugs. On May 14, 1997, the NCA and Parts III and IV of the FDA were repealed and replaced by the Controlled Drugs and Substances Act (CDSA). This consolidation of drug control legislation allowed for the control of precursors (substances used to make psychoactive substances), and dealt with the forfeiture of property and goods related to illegal drug activities.

Before the proclamation of the CDSA, drug offences were reported on the basis of six drug categories: heroin, cocaine, cannabis, other drugs, controlled drugs and restricted drugs. Under the CDSA there are four categories of drug offences: heroin, cocaine, cannabis and other CDSA drugs. Generally speaking, the other CDSA drug category contains those drugs previously included in the other, controlled and restricted categories. The consolidation of illicit drugs into the new categories provided by the CDSA did not commence until mid-1997. As such, 1997 was a transition year in the reporting of drug offences, and 1998 represents the first complete calendar year in the reporting of illicit drug offences under the CDSA.

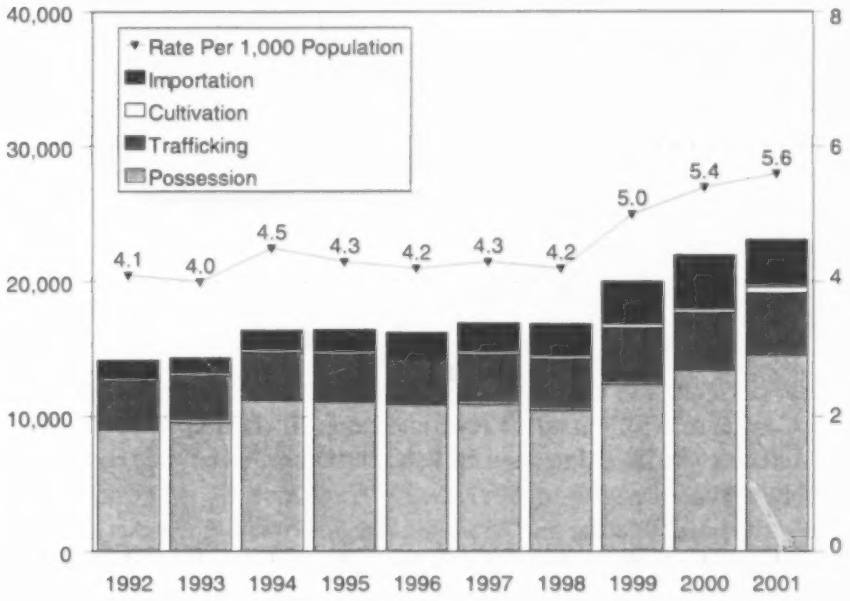
Drug Crime in 2001

The total number of drug-related federal statute offences reported in 2001 was 23,070 representing a drug offence crime rate of 5.6 offences per 1,000 population. This represents a 5% increase in the number of drug offences reported over 2000. During the past decade the number of reported drug offences increased by 63%, from 14,160 in 1992 to 23,070 in 2001.

It is important to note that drug offence data are volatile because the reporting of drug offences is directly influenced by changes in police enforcement practices. For example, decisions by policing organizations to crack down on marijuana grow operations are likely to result in an increase in the number of reported cultivation offences. Consequently, increases (or possible decreases) in the number of drug offences may be the result of enforcement policies rather than an actual change in the rate of drug use by the public.

On May 14, 1997, the Narcotic Control Act and Parts III and IV of the Food and Drugs Act were repealed and replaced by the Controlled Drugs and Substances Act.

Figure 32: Number and Rate of Drug Crimes, 1992 to 2001.



In 2001, 17,530 (76%) drug offences involved cannabis. A further 3,670 (16%) involved cocaine. Of the remaining drug offences, 640 (3%) involved heroin (considered the most serious drug offence) and 1,230 (5%) involved other drugs.

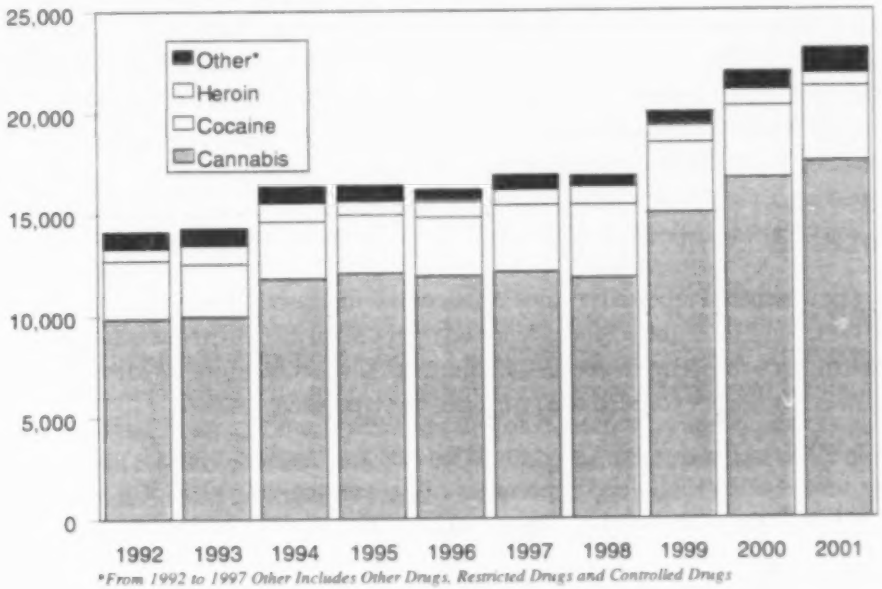
The types of drug offences include possession, trafficking, importation and cultivation. In 2001, possession offences represented 63% (14,540) of all drug offences, while 20% (4,570) were for trafficking, 15% (3,470) for cultivation and 2% (490) for importation. These proportions have remained relatively stable during the past decade, although cannabis cultivation offences increased 150% from 1,350 offences in 1992 to 3,470 offences in 2001.

In 2001, 16,330 (71%) drug offences were cleared. Over the last ten years the percentage of drug offences cleared has fluctuated, ranging from a high of 82% in 1993, to a low of 71% in 2001. Of all drug offences, 6,490 (28%) were cleared

by charge in 2001 and 9,840 (43%) were cleared by other means. Since 1992, the proportion of incidents cleared by charge has decreased, while the proportion of incidents cleared by other means has increased.

The number of drug offences cleared by charge is relatively low considering the nature of the crime. Lack of verification of ownership of seized or found drugs is the major contributing factor in low charge rates.

Figure 33: Drug Crimes by Type of Drug, 1992 to 2001.



*From 1992 to 1997 Other Includes Other Drugs, Restricted Drugs and Controlled Drugs

Drug offence data are volatile because the reporting of drug offences is directly influenced by changes in police enforcement practices.

Of the 8,990 people charged with drug offences in 2001, 4,205 (47%) were charged with trafficking offences, 3,045 (34%) with possession offences, 1,620 (18%) with cultivation offences and 120 (1%) with importation offences. Adults accounted for 92% (8,250) of persons charged while youths accounted for 8% (740). Males represented 82% (7,360) of persons charged while the remaining 18% (1,630) were females.

Cannabis

Cannabis includes hashish or marijuana in either powdered, leaf, liquid or resin form. Offences involving cannabis represented three-quarters of all drug offences in 2001, and have comprised most drug offences in B.C. over the past decade.

In 2001, there were 17,530 cannabis offences, 5% more than the 16,740 offences reported in 2000. Between 1992 and 2001, the number of cannabis offences increased by 78%, increasing from 9,870 offences reported in 1992 to 17,530 offences reported in 2001. In 2001, the crime rate for cannabis offences was four per 1,000 population.

In 2001, possession accounted for 67% (11,760) of cannabis offences and cultivation represented 20% (3,470) while trafficking (2,100) and importation (200) represented 12% and 1% respectively.

Although the proportion of possession and importation offences has remained relatively stable in the last ten years, the proportion of trafficking and cultivation offences has fluctuated. Trafficking offences accounted for a high of 14% of all cannabis offences in 1992, and a low of 9% in 1998. In 1992, cultivation offences represented 14% of cannabis offences compared with 20% in 2001.

In 2001, 12,310 (70%) cannabis offences were cleared, 3,820 (22%) by charge and 8,490 (48%) by other means.

Of the 5,690 persons charged with cannabis offences in 2001, 2,070 (36%) were charged with possession offences, 1,980 (35%) with trafficking offences, 1,620 (28%) with cultivation offences and 20 (1%) with importation offences. Adults accounted for 89% (5,090) of persons charged while youths accounted for 11% (600). Males represented 83% (4,720) of persons charged while the remaining 17% (970) were females.

Cocaine

In 2001, 76% of drug offences involved cannabis.

The number of reported cocaine offences has increased 28% since 1992. In 2001, the 3,670 cocaine offences reported represented a 4% increase from the 3,520 offences reported in 2000. Over the last ten years the crime rate for cocaine offences has never exceeded one crime per 1,000 persons.

In 2001, trafficking accounted for 51% (1,880) of cocaine offences, possession represented 47% (1,740) and importation offences represented 2% (50).

In 2001, 2,750 (75%) cocaine offences were cleared, 1,990 (54%) by charge and 760 (21%) by other means.

Of the 2,460 persons charged with cocaine offences in 2001, 1,760 (72%) were charged with trafficking offences, 680 (28%) with possession offences, and 20 (less than 1%) with importation offences. Adults accounted for 96% (2,360) of persons charged while youths accounted for 4% (100). Males represented 80% (1,980) of persons charged while the remaining 20% (480) were females.

Heroin

In the late 1980s, the number of heroin offences was relatively stable at approximately 280 offences each year. Between 1992 and 1994, the number of heroin offences almost doubled, reaching a high of 925 offences in 1994. From 1995 to 2000, however, the number of heroin offences decreased by 15% to an average of 800 offences per year. In 2001, there were 640 heroin offences reported, a 20% decrease from the 800 reported in 2000. The heroin crime rate has never exceeded one offence per 1,000 persons between 1992 and 2001.

In 2001, possession accounted for 58% (370) of heroin offences, trafficking accounted for 41% (260), and importation offences accounted for the remaining 1% (10).

In 2001, 510 (80%) heroin offences were cleared, 330 (52%) by charge and 180 (28%) by other means.

Of the 410 persons charged with heroin offences in 2001, 265 (65%) were charged with trafficking offences, 135 (33%) with possession offences and 10 (2%) with importation offences. Adults accounted for 98% (400) of persons charged while youths accounted for 2% (10). Males represented 78% (320) of persons charged while the remaining 22% (90) were females.

Other CDSA Drugs

In 2001, 54% of other CDSA drug offences were for possession. Trafficking and importation represented 27% and 19% respectively.

Prior to 1997, the "other drugs" category comprised all narcotics (with the exclusion of heroin, cocaine, and cannabis) described by the Narcotic Control Act, in addition to illicit drugs or substances described in Schedule F of the Food and Drugs Act. These included, for example, derivatives of the opium poppy (such as codeine, morphine and opium), antibiotics, anticoagulants, antidepressants and anabolic steroids. Beginning in mid-1997, however, the other drug category was renamed the "other CDSA drug" category and included the above noted substances along with many of the drugs previously included in the controlled and restricted drugs categories.

In 2001, there were 1,230 other drug offences reported, representing a 39% increase over the 890 reported in 2000. The number of offences in this category has fluctuated considerably over the last ten years. During this time period, the total number of other drug offences reached a low of 200 offences in 1995 and peaked at a high of 1,230 offences reported in 2001. Despite this increase,the other drug offence rate has never exceeded one offence per 1,000 persons.

In 2001, possession accounted for 54% (670) of other CDSA drug offences, trafficking accounted for 27% (330) and importation accounted for the remaining 19% (230).

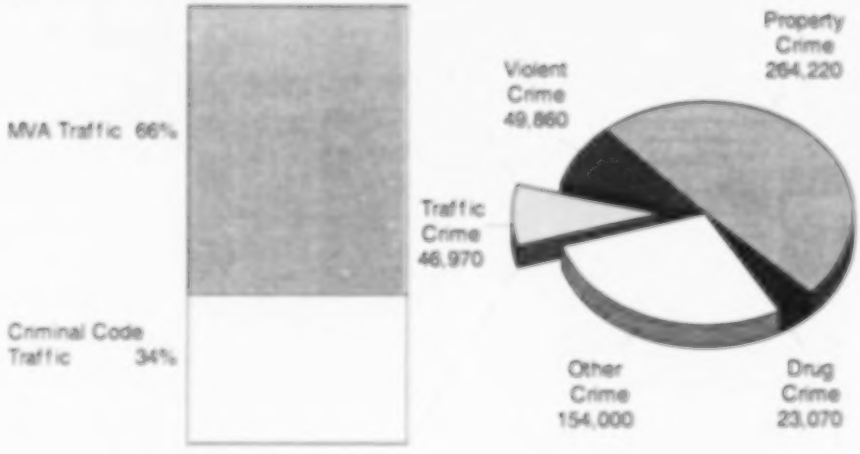
In 2001, 760 (62%) other drug offences were cleared, 350 (29%) by charge and 410 (33%) by other means.

Of the 430 persons charged with other drug offences in 2001, 200 (47%) were charged with trafficking offences, 160 (37%) were charged with possession offences and 70 (16%) were charged with importation offences. Adults accounted for 93% (400) of persons charged while youths accounted for 7% (30). Males represented 79% (340) of persons charged while the remaining 21% (90) were females.

CHAPTER 6

Traffic Crime in British Columbia

Figure 34: Traffic Crime by Category, 2001.



In British Columbia, police report traffic offences under either the federal Criminal Code or the provincial Motor Vehicle Act. A total of 46,970 traffic offences were reported in 2001, 34% were Criminal Code offences and the remaining 66% were offences under the Motor Vehicle Act.

Criminal Code: Traffic

Criminal Code traffic offences are collected under the categories of impaired or dangerous operation of a vehicle (including motor vehicles, boats, vessels, and aircraft), failure to stop at the scene of an accident, driving a vehicle while prohibited from doing so, and failing or refusing to provide either a breath or blood sample upon demand by police.

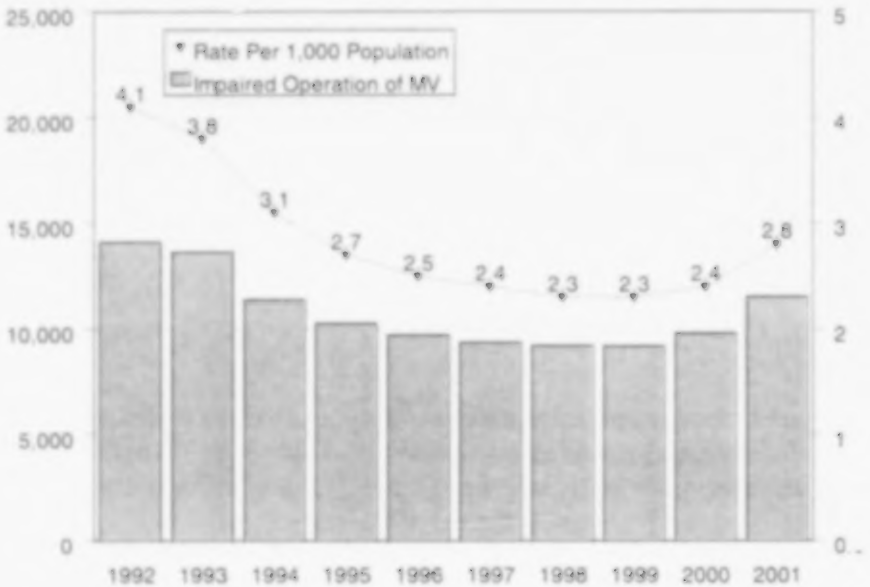
In 2001, there were 16,190 Criminal Code traffic offences reported by the police. Between 1992 and 2001, the number of Criminal Code traffic offences reported by the police has declined by 26%.

Of the 16,190 Criminal Code traffic offences reported in 2001, 11,600 or 72% were reported in the impaired operation of a vehicle category. The majority of these (99%) were for impaired operation or driving with a blood alcohol level over .08%, approximately 1% were for impaired operation causing bodily harm, and less than 1% were for impaired operation causing death.

Although impaired operation of a vehicle has historically represented the greatest proportion of Criminal Code traffic offences — 64% in 1992 and more than 70% in 2001 — the frequency of this type of offence has decreased 18% over the past ten years. Increased police enforcement, anti-drinking and driving campaigns, societal pressure, and joint police and government safety initiatives are thought to have combined to reduce the number of these offences. However, it should be noted that as the number of reported Criminal Code impaired operation crimes has declined, the number of administrative prohibitions (24-hour roadside suspensions) has increased. One possible reason for the diverging trend is that a driving prohibition under provincial legislation can be issued on the suspicion by a peace officer that a person's ability to drive is impaired. In order to lay charges under the Criminal Code, on the other hand, clinically based evidence such as blood or breath samples is normally required.

Increased police enforcement and initiatives such as anti-drinking and driving campaigns are thought to have combined to reduce the number of impaired operation of motor vehicle offences.

Figure 35: Number of Impaired Operation Offences, 1992 to 2001.

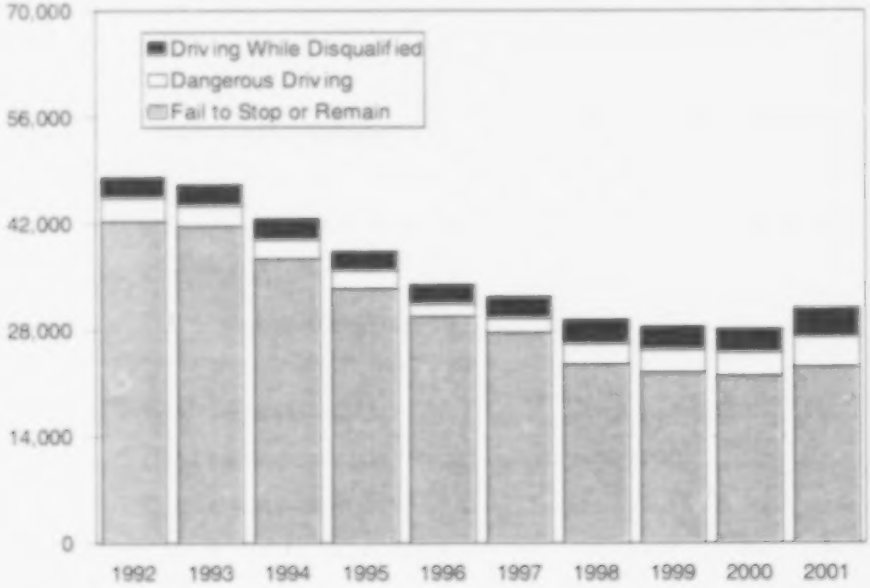


The remaining 28% of Criminal Code traffic offences in 2001 included the following: failure to stop or remain at the scene of an accident (12%), driving a motor vehicle while prohibited (6%), dangerous operation of a motor vehicle (6%), and not providing a breath or blood sample upon demand (4%).

Provincial Statutes: Traffic

Under the UCR Survey, only three categories of traffic offences covered by the provincial Motor Vehicle Act are counted. These include the following: failure to stop or remain at the scene of an accident (hit and run), dangerous driving, and driving while licence suspended.

Figure 36: Number of Provincial Statute Traffic Offences, 1992 to 2001.



In 2001, there were 30,780 Motor Vehicle Act traffic offences; 75% of these were for hit and run.

In 2001, there were 30,780 Motor Vehicle Act traffic offences reported in B.C. Approximately 75% of these offences were for hit and run, 13% were for dangerous driving and 12% were for driving with a suspended licence.

APPENDIX A-1 FOOTNOTES

1. The population figure includes municipal and First Nations Reserve populations.
2. The detachment at Parksville is now known as Oceanside.
3. The policing costs for Colwood and Pitt Meadows are estimates based on actual 2001 contract costs and estimated 2001 "over and above" costs.
4. Authorized police strengths and their associated costs for all twelve jurisdictions have been adjusted to exclude secondments to other agencies, e.g., Justice Institute - B.C. Police Academy, OCABC, as reported to police Services for calendar year 2001.
5. Total costs refer to actual and not authorized (or budgeted) costs in calendar year 2001 as reported by each municipality to Police Services. For the municipalities policed by the RCMP, total costs include the municipality's share of RCMP contract costs, plus those costs borne 100% by the municipality which are over and above the contract costs, such as support staff and accommodation. If a municipality included the costs of bylaw enforcement or victim services programs in their actual expenditures, these have been excluded. Total costs also do not include capital expenditures, such as major construction projects, and they are also exclusive of any revenues. Note that some variation exists between jurisdictions with respect to the cost items that are included in their policing budgets.

APPENDIX A-1 DATA QUALIFIERS

1. Canada Census occurred in 1996. The population figures contained in this report are estimates based on 1996 Census data. The population in the 1996 Census determines which population category (5,000 to 15,000 or over 15,000 population) a municipality policed by the RCMP is in. Five municipalities exceeded 5,000 population in the 1996 Census and became responsible for their policing services in April 1997. Three municipalities: Courtenay, Fort St. John and Salmon Arm exceeded 15,000 population in the 1996 Census and moved from the 5,000 to 15,000 category to the over 15,000 population category.
2. Population figures reflect the "resident" or "late night" population of a jurisdiction or municipality, rather than the number of people who spend some part of the day in the area either for business or pleasure purposes. Furthermore, populations do not take into account "resident non-residents", i.e. cottage/chalet owners or students residing at universities or colleges whose permanent residence is within another jurisdiction.
3. Authorized police strength is based on the authorized police strength as of December 31, 2001. The authorized strength of the RCMP is obtained from RCMP "E" Division Headquarters. The authorized strength of the Independent jurisdictions is collected annually from each department.
4. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences where one incident with multiple victims is scored as one offence, police record one offence for every victim of a "violent" crime, e.g. homicide, attempted murder, sexual and non-sexual assault, and abduction. Total CC Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.
5. Total CC Offences include Criminal Code - Property, Person and Other offences. Criminal Code - Property offences include break and enters, motor vehicle thefts, theft over and less than $5000, fraud, and possession of stolen property. Criminal Code - Person offences include violent crimes such as homicides, attempted murder, sexual and non sexual assaults, robbery and abduction. Criminal Code - Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, bail violations, disturb the peace, and mischief and property damage (vandalism). Criminal Code-Traffic offences are not included in Total CC offences.

APPENDIX A-1 DATA QUALIFIERS

6. Crime rate is defined as the number of Criminal Code offences (Excluding Traffic) per 1,000 population. It is based on the number of crimes occurring within each jurisdiction and on the resident population. Crime rate is based on a population which excludes tourists, commuters, or "part time" residents such as students or cottage/chalet owners. Crime rates for municipalities do not take into account the "core city syndrome" in which a number of people spend some part of the day in the city for either business or pleasure purposes, i.e. tourists and commuters.

7. Many municipalities exhibit what is commonly referred to as the "core city syndrome". These cities are surrounded by urban or unincorporated areas which have substantial residential populations. As a result, the crime rates would be lower for the combined populated areas than for those municipalities by themselves.

8. Criminal Code Case Burden is defined as the number of Criminal Code offences (Excluding Traffic) per authorized police strength. The total number of Criminal Code offences and the authorized police strength as of December 31, 2001 are used to calculate case burden.

9. Comparisons between the case burdens of independent municipal forces and RCMP municipal forces may be erroneous due to differences in the organizational structures of the RCMP and independent municipal forces. The RCMP municipal forces may have a relatively lower sworn strength because of the administrative support provided by "E" Division Headquarters.

10. Populations, crime rates and case burdens are only three of the many factors used to determine the strength and organization of a police force. A number of other factors, such as size, accessibility of the area to be policed, and traffic volume are also taken into consideration. Case burdens and crime rates also do not reflect the time spent by police providing general assistance to the public, or participating in crime prevention programs, or enforcing traffic laws.

11. Summary data and statistics for the independent and RCMP municipal Forces are shown as the last line of each Table. The Criminal Code case burden, and crime rate are generated from the totals, and do not represent the average of the rates for each individual jurisdiction.

Appendix A-2: Contribution to Policing by Level of Government, 2001

Type of Force	Police Strength	Population Policed	Total Police Costs Paid By: Mun Govt	Prov Govt	Fed Govt	Total
12 INDEPENDENT FORCES

83 Muns under 5,000 Population		185,408	$ 0	$ 153,500,000	$ 65,785,714	$ 219,285,714
Unincorporated Areas[2]		546,525	$ Partial[2]	$ 0	$ 0	$ 0
Subtotal	1,694	731,933	$ 0	$ 153,500,000	$ 65,785,714	$ 219,285,714
FIRST NATIONS ADMINISTERED POLICE SERVICES[3]						
Subtotal	13	3,154	0	$ 593,040	$ 565,500	$ 1,158,540
BRITISH COLUMBIA	**6,400**	**4,095,934**	**$ 544,672,111**	**$ 154,393,040**	**$ 100,585,698**	**$ 799,650,849**

APPENDIX A-2 FOOTNOTES

1. Municipalities policed by the RCMP are categorized into two groups according to their population: 5,000 to 15,000 or over 15,000 population. Population figures shown are estimates based on the results of the 1996 Canada Census.

2. The unincorporated areas of the province make no direct contribution towards their policing services. However, the rural property tax collected from residents serves to offset, to some degree, the cost of policing rural communities.

3. The three First Nations Administered Police Services – Kitasoo-Xaixais, Stl'atl'imx, and Ditidaht – were opened in 1999. Each of these police services are autonomous and independent of the RCMP. Their costs are shared jointly between the Federal (52%) and Provincial (48%) governments.

APPENDIX A-2 DATA QUALIFIERS

1. All expenditure figures shown above for the Federal and Provincial governments represent estimated costs paid in fiscal year 2001/2002. The expenditure figures for municipalities with independent and RCMP municipal forces represent estimated costs paid by them in calendar year 2001. ***Federal and provincial government contributions are preliminary, pending a final reconciliation of RCMP municipal and provincial force contract costs.***

2. Expenditure figures for the 59 municipalities with RCMP municipal forces include both the contract costs, and those costs paid by the municipality which are over and above the contract costs (for example, support staff salaries and benefits, and accommodation costs). These figures exclude Bylaw enforcement and victim services program costs where municipalities have this in their policing budget. The Federal government contributions to policing include their share of municipal and provincial policing costs. These figures only represent their share of the contract costs, and exclude costs borne by the Federal government which are over and above the contract costs. These figures also exclude the costs to Canada for Federal Force members operating in B.C. ***Federal government contributions are preliminary, pending a final reconciliation of RCMP municipal and provincial contract costs.***

3. Canada Census occurred in 1996. The population figures for 2001 in this report are estimates based on 1996 Census data. The population in the 1996 Census determines which population category (5,000 to 15,000 or over 15,000 population) a municipality policed by the RCMP is in.

4. Five municipalities exceeded 5,000 population in the 1996 Census and became responsible for their policing services on April 1, 1997. They are Hope, Ladysmith, Lake Country, Spallumcheen and Whistler. Note that the costs for these five municipalities are included in the 5,000 to 15,000 population group. Lake Country received a Local Government Restructure Grant for Policing (LGRGP) totaling $300,000 in February 2001 from the provincial government. Since this amount was paid in calendar year 2001, it has been deducted from the total costs reported by municipal governments in the 5,000 to 15,000 population category.

5. In 2001/2002, under RCMP Policing Agreements, municipalities over 15,000 population were paying 90% of their contract policing costs, and municipalities between 5,000 and 15,000 were paying 70% of their contract costs. In the same years the Province was paying 70% of provincial policing costs. For the 3 First Nations Administered Police Services, the Province pays 48% and the Federal government pays 52% of the total policing costs.

APPENDIX A-3 FOOTNOTES

1 In 2001 the overall strength of RCMP Division Administration increased by 6 positions. One position was added for overall administration; three positions were added in Human Resources, Health Services and Staff Relations, and two were added in Informatics. In 2000 the overall strength of RCMP Division Administration increased by 5 positions. Three positions were added for the BC Policing Study, one position was added for firearms registration and one position was added to the Informatics Field Support section. In 1999 the overall strength of RCMP Division Administration increased by 3 positions. In departmental administration three lawyers ("Appropriate Officer Representatives") were added; there was also a net increase of two positions dedicated to firearms registration. However, division administration lost two fitness and lifestyle advisory positions, cancelling out the two firearms registration positions. In 1998 the strength of RCMP Division Administration was increased by 18 positions: sixteen firearms registration positions and three other administrative positions were added to departmental administration; one position was decreased in the staffing and personnel services area. In 1997 the strength of RCMP Division Administration was decreased by eight positions in the areas of internal affairs, staffing and departmental administration. In 1996 the strength was decreased by twelve positions in the areas of information (informatics) and training services. In 1993 the strength was increased by seven positions in the areas of financial services and internal investigations.

2 In 2001 the strength of Federal Criminal Law increased by seventeen positions. Eight positions were added in Customs and Excise; three positions were added for outlaw motorcycle gang investigations; and six positions were added for money laundering enforcement. In 1999 the strength of Federal Criminal Law increased by twenty-two positions. Eleven positions were added to "E" Division's criminal analysis section, three positions were added in federal protection intelligence support, five positions were added in the Vancouver criminal intelligence section, and three positions were added in district criminal intelligence and proceeds of crime. In 1998 the strength of Federal Criminal Law decreased by one position in the area of foreign and domestic support. In 1997 the strength of Federal Criminal Law was increased by seven positions in the areas of drug enforcement and awareness, and proceeds of crime enforcement. In 1996 the strength was decreased by five positions in the area of immigration and passport services. In 1995 the strength was decreased by six positions in the areas of investigative and support services. In 1994 the strength was increased by three positions assigned to the proceeds of crime section. In 1993 the strength was increased by six positions in the areas of drug enforcement and investigative services.

3 In 1993 and 1994 the strength of the RCMP First Nations Policing Program increased each year by eleven positions to provide Aboriginal Community Constables (ACCP) and First Nations Community Policing Services (FNCPS). The Aboriginal Community Constables were known as Indian Special Constables before 1993. In 2001 there were 32 ACCP and 39 FNCPS positions.

4 In 1997 the strength of International Airports was decreased by 65 positions as a result of Richmond Municipal Detachment assuming policing responsibility for Vancouver International Airport from the RCMP Federal Force. In 1994 the strength of International Airports was decreased by twelve positions — eight at Vancouver International Airport and four at Victoria International Airport. In 1993 the strength of International Airports was decreased by six positions as a result of Federal Treasury Board policy directives.

APPENDIX A-3 FOOTNOTES CONTINUED

[5] In 2000 the overall strength of Protective Policing decreased by six positions. Three positions in Security Systems Education and six in Departmental Security were lost; these nine positions were offset by an increase of three positions in the Explosives Disposal unit. In 1998 the strength of Protective Policing decreased by four positions assigned to departmental security and security systems education. In 1997 the strength of Protective Policing increased by two positions assigned to VIP services. In 1996 the strength of Protective Policing was decreased by three positions in the area of diplomatic protection services. In 1995 the strength of Protective Policing was decreased by ten positions: six in the area of counter-surveillance and four after the completion of the Commonwealth Games. In 1994 the strength of Protective Policing was decreased by ten positions in the area of diplomatic protection. In 1993 the strength of Protective Policing was decreased by twelve positions as a result of Treasury Board policy directives.

[6] Provincial Force Headquarters provides specialized policing services and functions at the provincial level, e.g. log theft unit, anti-tobacco smuggling unit, unsolved homicide unit, etc. In 1999, there was a decrease of five positions in the Security Frauds Investigations office. In 1998, there was an increase of twelve positions: six for the auto theft task force, five in operational support and one for Substance Abuse Education. In 1997, there was a net increase of five positions. There were increases of twelve positions in Anti-Tobacco Smuggling, two Proceeds of Crime, three Criminal Intelligence and six Technical Services positions, but decreases of four Telecommunications and fourteen Operational Support positions. In 1996 the strength of Provincial Force Headquarters increased by thirty-eight positions: twelve of these were for the unsolved homicide squad, four were for Liquor Act enforcement, and most of the balance were for operational support.

[7] In 1997 the RCMP restructured its eight subdivisions into four districts known as Island, North, Southwest, and Southeast. Each District Headquarters provides specialized policing services and functions at the regional level, e.g. clerical/administrative services, communication centres, patrol vessels, and air services. In 1998, there was a net decrease of seventeen positions at District Headquarters. There was a decrease of thirty-three positions in operational support; these were District, Section, and Co-ordinator positions. There were increases of seven investigation, three telecommunications, four substance abuse education and two other support positions for a total of sixteen. In 1997, there was a net increase of fifty-four positions at District Headquarters. There was an increase of thirty-three positions at Communications Centres and twenty positions in operational support due to restructuring of subdivisions into districts. There was an increase of four other positions in intelligence and other support services. There was a decrease of three positions in investigation and identification services at the District level. In 1996 there was a net increase of five positions assigned to subdivision Headquarters. There were increases of four positions in telecommunications, two in identification and three in dog squads, and decreases of one position in operational support and three in marine services.

[8] Provincial Force Detachments provide policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the Province. Provincial Force Detachments are usually named after a municipality; however, if a municipality is under 5,000 population the detachment polices not only the municipality but also the unincorporated or rural area surrounding it. If a municipality is over 5,000 population, the Provincial Force Detachment polices only the surrounding or unincorporated area. The specialized functions at Provincial Force Detachments include sworn members assigned to specialized police services at the community level, i.e. forensic identification, crime prevention, victim services, and police dogs. In 1996, as a result of changes in reporting responsibility, twenty-five positions assigned to community service (specialized) functions were transferrred from Provincial Force Detachments to District Headquarters.

[9] In 1999 the strength for Traffic Enforcement was increased by five photo radar positions and decreased by one traffic services position at "E" Division. Therefore, there was a net increase of four positions in dedicated traffic enforcement. In 1998 the strength for Traffic Enforcement was increased by two photo radar positions. In 1997 there was a net increase in the strength for Traffic Enforcement of one position (net decrease of one Highway Patrol and increase of two Traffic NCO/Analyst positions). In 1996 the strength for Traffic enforcement was increased by forty-two Photo Radar and two Highway Patrol positions at detachments, but decreased by ten Traffic NCO and Analyst positions and four Highway Patrol positions not reportable to detachments, for a net gain of thirty positions. In 1995, Traffic enforcement strength increased by forty-one positions as a result of the Photo Radar Project.

[10] In 1981 Canada Census indicated that seven municipalities — Coldstream, Fernie, North Saanich, Parksville, Pitt Meadows, Port Hardy, and Revelstoke — exceeded 5,000 population. The 1986 Canada Census indicated that the Municipality of Colwood was also over 5,000 population. Since their populations were officially over 5,000 persons, these municipalities pursuant to the Police Act and Municipal Act became responsible for their police services. Instead of contracting for RCMP Municipal police services, it was agreed that the Provincial Force would "extend" police services to these eight municipalities on a fee for service basis, and the municipalities would reimbruse the Province for the Provincial Force police services they received. In 1992 seven of these municipalities contracted for RCMP Municipal police services; the eight municipality, Fernie, entered into an RCMP Municipal contract in 1994. In 1997 Fernie reverted to a provincial policing jurisdiction based on the result of the 1996 Canada Census which placed its population below 5,000 persons. Five municipalities — Hope, Ladysmith, Lake Country, Spallumcheen, and Whistler — exceeded 5,000 population in the 1996 Census, however, and became responsible for their policing services in 1997.

[11] In British Columbia a municipality under the Police Act and Municipal Act becomes responsible for its police services when the Canada Census indicates its population exceeds 5,000 persons. In 2001 there were twelve municipalities which operated their own "independent" police departments, and fifty-nine which contracted with the RCMP for municipal police services.

[12] In 2001 there were three First Nations Administered Police Services: St'at'imx Tribal Police; Kitasoo-Xaixais Public Safety Department; and Dididaht First Nation Public Safety and Policing Service. These police services are autonomous and independent of the RCMP.

APPENDIX A-3 DATA QUALIFIERS

1. The police strength of the RCMP is obtained from the PARADE/HRMIS Reports, and is based on the authorized strength as of December 31st of each calendar year. Authorized strength includes all sworn members and sworn civilian members. Police strength for the RCMP forces does not include non-sworn civilian support staff, bylaw enforcement officers, or RCMP Auxiliary Police.
2. The police strength of the Twelve Independent Municipal Forces is submitted annually to Police Services, and is based on the authorized strength as of December 31st of each calendar year. Police strength for the Independent Forces does not include non-sworn civilian support staff, bylaw enforcement officers or reserve police officers.

APPENDIX A-4 AND A-5 FOOTNOTES

1 The following provincial policing jurisdictions have either been closed or opened as a result of RCMP detachment restructures. Where detachments have been closed, i.e., amalgamated, the data shown reflect the total reporting for both the present jurisdiction and the absorbed jurisdiction, up to and including the year in which the two detachments were amalgamated. In 1993, Cassiar detachment was closed with Dease Lake detachment assuming policing responsibilities for the area. In 1995, as a result of Mackenzie detachment being restructured, Tsay Keh Dene detachment was opened. In 1997, Field detachment was closed with Golden detachment assuming policing responsibilities for the area. In 1999, Radium Hot Springs detachment was closed with Columbia Valley detachment assuming policing responsibilities for the area. In 2000, as a result of Fort St. James detachment being restructured, Takla Landing detachment was opened.

2 The Police Act and Municipal Act state that when the population of a municipality reaches 5,000 persons as a result of Canada Census it must assumed responsibility for its police services. These municipalities may form their own independent police forces or contract with the RCMP for municipal police services. In 1993, the municipality of Qualicum Beach became responsible for its police services. In 1994, the municipalities of Smithers and Langford became responsible for their police services. In 1997, the municipalities of Spallumcheen, Lake Country, Hope, Whistler and Ladysmith became responsible for their police services. All of the aforementioned municipalities contracted with the RCMP for their municipal police services.

3 In 1997, as a result of the 1996 Canada Census, the population of the municipality of Fernie dropped below 5,000 persons and Fernie reverted to a provincial policing jurisdiction.

APPENDIX A-4 AND A-5 FOOTNOTES CONTINUED

[4] In 1995, the municipalities of Abbotsford and Matsqui were amalgamated. As a result, the Abbotsford Municipal RCMP detachment and the Matsqui Police Department were formed into an independent police force called the Abbotsford Police Department.

[5] Prior to 1995, data for North Vancouver provincial detachment is included in Bowen Island provincial detachment.

[6] Population figures also include First Nations Reserve populations.

[7] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within the parks.

[8] The three First Nations Administered Police Services – Kitasoo-Xaixais, Stl'atl'imx, and Ditidaht – were opened in 1999. Each of these police services are autonomous and independent of the RCMP.

[9] The Policing Jurisdictions Total does not include reporting by Canadian Pacific Railway Police, Canadian National Railway Police and other specialized units.

APPENDIX A-4 AND A-5 DATA QUALIFIERS

1. The Provincial Force provides policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the province. If a municipality is under 5,000 population, the Provincial Force polices not only the municipality but also the unincorporated or rural area surrounding it. If a municipality is over 5,000 population, the Provincial Force polices only the surrounding unincorporated area.

2. The police strength for municipal force jurisdictions (Mun) represents the number of sworn members assigned to a detachment or municipal department but does not include civilian members, support staff and bylaw enforcement officers. The police strength for provincial force jurisdictions (Prov) represents the number of police assigned to general duty and general investigation functions but does not include police assigned to specialized functions such as highway patrol or forensic identification.

3. The offence data contained in Appendix A5 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

4. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 1996 Canada Census. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are usually surrounded by unincorporated areas or other municipalities that have large residential populations. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owner, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

5. The case burden is defined as the number of Criminal Code offences (excluding traffic offences) per authorized police strength. Because it represents the workload per officer in each policing jurisdiction, the case burden is a better indicator of the demand for police services than either population or crime rate. In Appendix A5, the total number of Criminal Code offences in 2001, and the authorized police strength as of December 31, 2001, are used to calculate the case burden. Comparisons between the case burdens of independent municipal forces and RCMP municipal forces may be erroneous due to differences in the organizational structures of the RCMP and independent municipal forces. The RCMP municipal forces may have a relatively lower sworn strength because of the administrative support provided by "E" Division Headquarters.

6. Case burden, crime rate and population are only three of the many factors used to determine the strength and organization of a police force. A number of other factors, such as size, accessibility of the area to be policed and traffic volume are also take into consideration. Case burden and crime rate also do not reflect the amount of time spent by police providing general assistance to the public, participating in crime prevention programs, or enforcing traffic laws.

APPENDIX B FOOTNOTES

[1] Population figures also include First Nations Reserve populations.

[2] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks.

[3] The crime data shown include estimates for the Cities of Vancouver and Port Moody. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Vancouver cover the reporting period of February to April 2001 and are based on the Vancouver Police Department's 2000 reporting under the UCR Incident-Based Survey. The estimates for Port Moody cover the reporting period of March to April 2001 and are based on the Port Moody Police Department's 2000 reporting under the UCR Survey.

[4] The three First Nations Administered Police Services -- Kitasoo-Xaixais, Stl'atl'imx, and Ditidaht -- were opened in 1999. Each of these police services is autonomous and independent of the RCMP.

APPENDIX B DATA QUALIFIERS

1. The offence data contained in Appendix B have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 1996 Canada Census. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are usually surrounded by unincorporated areas or other municipalities that have large residential populations. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owners, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

3. The police strength for municipal force jurisdictions (Mun) represents the number of sworn members assigned to a detachment or municipal department but does not include civilian members, support staff and bylaw enforcement officers. The police strength for provincial force jurisdictions (Prov) represents the number of police assigned to general duty and general investigation functions but does not include police assigned to specialized functions such as highway patrol or forensic identification.

4. The British Columbia total includes additional reporting from Canadian National Railway Police, Canadian Pacific Railway Police and other specialized units.

APPENDIX C FOOTNOTES

[1] The crime data shown for 1994 include estimates for the Cities of Vancouver and Victoria. The estimates for Vancouver cover the reporting period of July to December 1994 and are based on the Vancouver Police Department's 1993 reporting under the UCR Incident-Based Survey. The estimates for Victoria cover the entire reporting year and are based on the Victoria Police Department's 1993 reporting under the UCR Survey.

The crime data shown for 1995 include estimates for the City of Vancouver. These estimates cover the reporting periods of August and October 1995 and are based on the Vancouver Police Department's "Monthly Activity Reports" for each month.

The crime data shown for 2001 include estimates for the Cities of Vancouver and Port Moody. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Vancouver cover the reporting period of February to April 2001 and are based on the Vancouver Police Department's 2000 reporting under the UCR Incident-Based Survey. The estimates for Port Moody cover the reporting period of March to April 2001 and are based on the Port Moody Police Department's 2000 reporting under the UCR Survey.

[2] In 1993, revised reporting procedures related to level 2 assault and assault unlawfully causing bodily harm were instituted. Consequently, from 1993 onward, level 2 assault offences increased while assault unlawfully causing bodily harm offences decreased.

[3] The theft and motor vehicle theft data shown for 1995 to 2000 are based on data contained in the Vancouver Police Department's "Monthly Activity Reports" and on data provided by the Vancouver Police Department's Special Support Unit.

[4] In 1995, the Vancouver Police Department (VPD) revised their reporting practices for offences in which property damage to motor vehicles occurred. Prior to 1995, these offences were reported as mischief and property damage. Subsequent to the revision in reporting practices, the VPD began reporting these offences as theft from motor vehicle offences. As a result of this change, in 1995 the number of mischief and property damage offences decreased and the number of theft from motor vehicle offences increased.

[5] Theft offences are classified according to the value of the goods stolen. Theft offences are divided into over and under $5,000 categories. The data shown are the total of these categories. Prior to 1995, theft offences were divided into over and under $1,000 categories.

[6] The incidence of prostitution offences is highly sensitive to changes in police enforcement practices and it is this factor that largely contributes to any increase or decrease in these offences.

[7] In 1992, 1993, and 1999 RCMP Commercial Crime Sections incorrectly reported counterfeit currency offences. As a result, estimates of RCMP Commercial Crime counterfeit currency data for these reporting periods are included in the figures shown.

[8] Mischief and property damage offences are classified according to the value of damage done to property. Mischief and property damage offences are divided into over and under $5,000 categories. The data shown are the total of these categories. Prior to 1995, mischief and property damage offences were divided into over and under $1,000 categories.

[9] OCC: Other offences include Criminal Code offences not covered by a specific UCR offence category (e.g., breach of probation, extortion, computer/data mischief, uttering threats, criminal harassment, etc.).

[10] In June 1997, the Controlled Drugs and Substances Act (CDSA) came into effect. The CDSA consolidates the Narcotic Control Act (NCA) and Parts III and IV, and Schedules F, G, and H of the Food and Drugs Act (FDA). Prior to the proclamation of the CDSA, drug offences were reported on the basis of six drug categories: heroin, cocaine, cannabis, other drugs, controlled drugs and restricted drugs. Under the CDSA there are now four categories of drug offences: heroin, cocaine, cannabis and other CDSA drugs. Generally speaking, the other CDSA drug category contains those drugs previously included in the controlled, restricted, and other drug categories. The consolidation of illicit drugs into the new categories provided by the CDSA did not commence until mid-1997. As such, 1997 is a transition year in the reporting of drug offences. The 1997 data contain approximately half a year of data reported under the drug categories provided by the NCA/FDA and half a year of reporting under the new CDSA drug categories. Consequently, data anomalies are apparent in the other drug, controlled drug and restricted drug categories.

[11] The cannabis data shown for 1992 contain estimates for the City of Vancouver. The estimates cover the entire year and are based on the Vancouver Police Department's "Monthly Activity Report" dated January 8, 1993.

[12] In December 1998, the Firearms Act came into effect. As a result, a new federal statute offence category called the Firearms Act was added to the UCR Survey. This category covered all non–Criminal Code weapons offences reported under the new legislation. As a result of the new legislation, the descriptions and contents of the UCR offence categories relating to Criminal Code weapons offences were changed. In 1999 offensive weapons data have been collected under the new categories of firearms usage, weapons possession and trafficking, and other weapons offences.

[13] The incidence of offences under federal statutes (excluding drugs) and provincial statutes (excluding traffic) is highly sensitive to changes in police enforcement practices and it is this factor that largely contributes to any increase or decrease in these offences.

[14] The traffic data shown for 1994 and 1995 contain estimates for the City of Vancouver. The estimates for 1994 cover the last six months of 1994 and are based on the Vancouver Police Department's 1993 reporting under the UCR Incident-Based Survey. The estimates for 1995 cover the reporting periods of August and October 1995 and are based on the Vancouver Police Department's "Monthly Activity Report" for each month.

APPENDIX C DATA QUALIFIERS

1. The offence, clearance, and persons charged data contained in Appendices C1 to C7 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The offence data contained in Appendix C8 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey traffic scoring rules. If a single criminal traffic incident contains a number of violations of the law, only the most serious one is recorded for UCR purposes (MSO Rule). The only exception to the MSO Rule is in incidents where an offender is charged with impaired operation and failure to provide either a breath or blood sample. In this situation both offences would be scored and cleared by charge, but only the more serious offence of impaired operation would reflect persons charged data.

3. The number of traffic offences represents only those traffic offences reported to or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted. These data do not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained. Parking violations are not included in any of the offence categories contained in Appendix C8.

4. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 1996 Canada Census.

5. The number of offences cleared represents the number of offences solved by the police. Offences are cleared by charge when the police file a Report to Crown counsel (RCC) recommending charges. This does not necessarily imply the swearing of an information or prosecution as Crown may return the case to police due to insufficient evidence or take no further action. Offences are cleared otherwise when the police have identified an offender and have enough evidence to support a charge, but do not recommend charges. Offences are cleared otherwise in specific situations, such as, the offender was under 12 years of age, the victim was uncooperative, the offender had diplomatic immunity, or the offender was previously sentenced for similar crimes. ***It should be noted that in 2000, the RCMP implemented PIRS reporting changes governing the clearance of an offence by other means. These changes stipulated that records could no longer be validated and cleared by other means without police inputting a suspect's name and date of brith. As a result, from 2000 onward, the number and rate of offences cleared, and those cleared by other means has decreased.***

6. The clearance rate is defined as the number of offences solved by police as a percentage of the number of offences reported by police. Caution should be used in the interpretation of clearance rates because the number of offences reported and the number of offences cleared within the same calendar year are not necessarily linked. Offences may be cleared or considered solved many months or even years after they are reported to police. Consequently, within the same reporting year, it is possible that the number of cleared offences exceeds the actual number of offences, resulting in clearance rates of over 100%.

7. The number of persons charged represents the number of people for whom the police have filed a Report to Crown counsel (RCC) alleging responsibility for an offence. An RCC does not necessarily imply the swearing of an information, or the prosecution or conviction of an individual as the Crown may return the case to police due to insufficient evidence, take no further action, approve diversion or alternative measures, or in the case of young offenders (youths), issue a letter of caution. Under the provisions of the Young Offenders Act, a young offender is defined as any individual under 18 years and over 11 years of age.

APPENDIX D FOOTNOTES

1 In 1995, the municipalities of Abbotsford and Matsqui were amalgamated. As a result, the Abbotsford Municipal RCMP detachment and the Matsqui Police Department were formed into an independent police force called the Abbotsford Police Department. Data shown for previous years combine both jurisdictions.

2 The following provincial policing jurisdictions have either been closed or opened as a result of RCMP detachment restructures. Where detachments have been closed, i.e. amalgamated, the data shown reflect the total reporting for both the present jurisdiction and the absorbed jurisdiction, up to and including the year in which the two detachments were amalgamated. In 1993, Cassiar detachment was closed with Dease Lake detachment assuming policing responsibilities for the area. In 1995, as a result of Mackenzie detachment being restructured, Tsay Keh Dene detachment was opened. In 1997, Field detachment was closed with Golden detachment assuming policing responsibilities for the area. In 1999, Radium Hot Springs detachment was closed with Columbia Valley detachment assuming policing responsibilities for the area. In 2000, as a result of Fort St. James detachment being restructured, Takla Landing detachment was opened.

3 In 1997, according to the 1996 Canada Census, the population of the municipality of Fernie dropped below 5,000 persons and Fernie reverted to a provincial policing jurisdiction.

4 The Police Act and Municipal Act state that when the population of a municipality reaches 5,000 persons according to the Canada Census, it must assume responsibility for its police services. These municipalities may form their own independent police forces or contract with the RCMP for municipal police services. In 1993, the municipality of Qualicum Beach became responsible for its police services. In 1994, the municipalities of Smithers and Langford became responsible for their police services. In 1997, the municipalities of Spallumcheen, Lake Country, Hope, Whistler and Ladysmith became responsible for their police services. All of these municipalities contracted with the RCMP for their municipal police services.

5 Prior to 1995, data for North Vancouver provincial detachment is included in Bowen Island provincial detachment.

6 The crime data shown for 1994 and 1995 include estimates for the City of Vancouver. The 1994 estimates cover the reporting period of July to December 1994 and are based on the Department's 1993 reporting under the UCR Incident-Based Survey. The 1995 estimates cover the reporting periods of August and October 1995, and are based on the Department's "Monthly Activity Reports" for each month.

The theft and motor vehicle theft data shown for 1995 to 2000 are based on data contained in the Vancouver Police Department's "Monthly Activity Reports" and on data supplied by the Vancouver Police Department's Special Support Unit.

In 1995, the Vancouver Police Department (VPD) revised their reporting practices for offences in which property damage to motor vehicles occurred. Prior to 1995, these offences were reported as mischief and property damage. Subsequent to the revision in reporting practices, the VPD began reporting these offences as theft from motor vehicle offences. In 1995, as a result of this change, the number of mischief and property damage offences decreased and the number of theft from motor vehicle offences increased.

In 2000 and 2001, as a result of E-Comm labour action, there were decreases in the number of crimes reported to the Vancouver Police Department. The labour action which began in September 2000 and ended in September 2001 affected the number of offences, e.g., theft, assault, and robbery, reported for each year.

The crime data shown for 2001 include estimates for the City of Vancouver. The estimates, which cover the February to April phase-in period required for PRIME-BC, are based on the Vancouver Police Department's 2000 reporting under the UCR Incident-Based Survey.

7 The crime data shown for 1994 include estimates for the City of Victoria. These estimates cover the entire reporting year and are based on the Victoria Police Department's 1993 reporting under the UCR Survey.

8 Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks.

9 Population figures also include First Nations Reserve populations.

10 The three First Nations Administered Police Services -- Kitasoo-Xaisxais, Stl'atl'imx, and Ditidaht -- were opened in mid-1999. As a result, 1999 was a transition year with full reporting beginning in 2000. Each of these police services is autonomous and independent of the RCMP.

11 The crime data shown for 2001 include estimates for the City of Port Moody. The estimates, which cover the March to April phase-in period required for PRIME-BC, are based on the Port Moody Police Department's 2000 reporting under the UCR Survey.

APPENDIX D DATA QUALIFIERS

1. The offence data contained in Appendices D1 to D13 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are based on the results of Canada Census, which is conducted every five years. Canada Census occurred in 1986, 1991, and 1996; population figures for intervening years are estimates based on Census data. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owners, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

3. The number of sexual offences includes level 1 sexual assault (least amount of bodily harm), level 2 sexual assault (involving bodily harm/weapon), level 3 sexual assault (aggravated), and other sexual offences including sexual interference, invitation to sexual touching, sexual exploitation and incest.

4. The number of assaults (non-sexual) includes level 1 assault (least amount of bodily harm), level 2 assault (involving bodily harm/weapon), level 3 assault (aggravated), unlawful bodily harm, shoot with intent, assault police, assault other officer and other assaults including poisoning and torture.

5. The number of break and enter offences includes break and enter (business premises), break and enter (residence), and other break and enter offences including breaking into trains, box-cars, unattached trailers and storage lockers.

6. The number of motor vehicle thefts includes thefts of automobiles, trucks, motorcycles, and other motor vehicles including motorized snow vehicles, and self-propelled farming and construction implements.

7. The number of thefts includes bicycle theft, theft from motor vehicle, shoplifting and other theft. Thefts are divided into over and under $5,000 categories. Prior to 1995, theft offences were divided into over and under $1,000 categories.

8. The number of mischief and property damage offences (vandalism) includes mischief and property damage over $5,000, and mischief and property damage under $5,000. Prior to 1995 mischief and property damage offences were divided into over and under $1,000 categories.

9. The B.C. total includes additional reporting from Canadian National Railway Police, Canadian Pacific Railway Police and other specialized units.
